भारत सरकार का उपक्रम NTPC Limited (A Government of India Enterprise)

#### Ref: Lara/EMG/Stage-I/2024

Transforming lives

Date: 30.05.2024

To, Regional Officer, Inspector General of Forests, Integrated Regional Office, Ministry of Environment, Forest & Climate Change Raipur. (mail:- iro.raipur-mefcc@gov.in)

Subject: 23rd Six Monthly Environment Compliance Report of NTPC-Lara Station Stage-I (2X800 MW).

# Ref. No.: MoEF & CC, Govt. Of India, New Delhi Reference File Number: J 13012/79/2007-1A-II (T); dated: 13.12.2012

Dear Sir,

This has reference to the environment clearance for Lara STPS, NTPC Ltd. Stage-I issued vide MoEF & CC, Govt. Of India, New Delhi Reference File Number: J 13012/79/2007-1A-II (T); dated: 13.12.2012. Kindly find the enclosed 23<sup>rd</sup> Six monthly environmental clearance compliance report for the period 01.10.2023 to 31.03.2024 for your record and kind information please.

Thanking You,

Yours Faithfully

Sudhir Dahiya 10 Additional General Manager (Environment Management Group) NTPC Lara

Enclosure: i) As above

#### COMPLIANCE REPORT OF ENVIRONMENTAL CLEARANCE CONDITIONS FOR LARA STPP, STAGE-I (2X800 MW)

## (PERIOD: October 2023 TO March 2024)

#### A. Specific Conditions:

S. No.	Description	Status of Implementation (As on 31.03.2024)
i	Vision document specifying prospective plan for the site shall be formulated and submitted to the Regional Office of the Ministry within <b>six months.</b>	Being Complied Vision document specifying prospective plan of the project was submitted to the Regional Office (Western Central Zone) of the MOEF&CC at Nagpur along with first six monthly compliance report vide NTPC letter dated 11.07.2013.
ii	Scheme for implementation for harnessing solar power within the premises of the plant particularly at available roof tops shall be formulated and status of implementation shall be submitted periodically to the Regional Office of the Ministry.	1164.8 KW roof top solar panels
iii	Provision for installation of FGD shall be provided for future use.	NTPC has already awarded contract for installation of FGD to M/s L&T on 31.07.2018 for controlling SOx concentration in flue gas in compliance to the latest MOEF&CC emission norms dated 07.12.2015 for TPP. The installation of FGD is in progress.
		FGD U#1 30 Days trial operation completed. U#2 erection is in final stage.
		Rs. 459 Crores Expenditure done out of total Rs. 571 Crore Package value.

iv	Coal transportation to plant site shall	Noted, Compliance assured.
	be undertaken by rail and no road transportation shall be permitted.	MoEF&CC vide gazette notification dated 21.05.2020 and OM dated 11.11.2020 has also accorded amendment regarding coal transportation by road.
V	A long-term study of radio activity and heavy metals content on coal to be used shall be carried out through a reputed institute. Thereafter mechanism for an in-built continuous monitoring for Radio activity and heavy metals in coal and fly ash (including bottom ash) shall be put in place. The Clause has been amended as : "Radio activity and Heavy Metals"	In compliance to the said stipulations, the heavy metal testing for coal, fly ash and bottom ash has been carried out by MOEF&CC approved vendor. The monitoring of radioactivity contents has also been carried out annually through M/s Board of Radioisotope Technology (BRIT), Department of Atomic Energy
	contents in coal & fly ash (including bottom ash) shall be carried out through a reputed institute once in a year and the analysis report to be submitted to the ministry and its Regional Office.	
vi	Sulphur and ash contents in the coal to be used in the project shall not exceed 0.5% and 34 % respectively at any given time. In case of variation of coal quality at any point of time fresh reference shall be made to the Ministry for suitable amendments to environmental clearance condition wherever necessary.	dated 11.11.2020 has modified this condition. The project proponent has to only inform to the Regional
vii	Bi-flue stack of 275 m height with flue gas velocity not less than 22 m/s shall be installed and provided with continuous online monitoring equipments for $SO_x$ , $NO_x$ and PM. Mercury emissions from stack may also be monitored on periodic basis.	Complied. Mercury emissions from stack are also monitored on periodic basis. Monitoring Reports attached.
viii	High Efficiency Electrostatic Precipitators (ESPs) shall be installed to ensure that particulate emission does not exceed 50 mg/Nm <sup>3</sup> .	The High Efficiency Electrostatic Precipitators (ESP), designed for achieving guaranteed efficiency of 99.97 % installed and operational to ensure that the emission of Particulate Matter (PM) is in compliance.

ix	Adequate dust extraction system such as cyclones / bag filters and water spray system in dusty areas such as in coal handling and ash handling points, transfer areas and other vulnerable dusty areas shall be provided.	transfer areas and other vulnerable
x	No mine void filling or filling up of low lying areas with fly ash shall be undertaken.	
xi	Utilization of 100% Fly Ash generated shall be made from 4th year of operation. Status of implementation shall be reported to the Regional Office of the Ministry from time to time.	prepared and all efforts are being made to achieve the targets in
xii	Fly ash shall be collected in dry form and storage facility (silos) shall be provided. Unutilized fly ash shall be disposed off in the ash pond in the form of slurry form.	
	Mercury and other heavy metals (As, Hg, Cr, Pb etc.) will be monitored in the bottom ash as also in the effluents emanating from the existing ash pond.	heavy metals in the bottom ash and
	No ash shall be disposed off in low lying area.	Ash utilization in low lying area is being done in line with MoEF&CC OM dated 28.08.2019 and in compliance to the MOEF&CC Notification dated 31.12.2021.
xiii	Ash pond shall be lined with HDPE/LDPE lining or any other suitable impermeable media such that no leachate takes place at any	Suitable impermeable media lining provided in all ash dykes.

	point of time.	
	Adequate safety measures shall also be implemented to protect the ash dyke from getting breached.	The structure of ash dykes is designed, constructed and operated as per State-of-the-Art engineering design and construction with adequate factor of Safety to avert any remote possibility of getting breached. Regular monitoring and inspection of ash dykes and an emergency response system ensure that there are no risks of failure as apprehended.
	Ash pond water shall be re- circulated and utilized.	In compliance. Ash Water recirculation system (AWRS) of adequate capacity installed and operational.
xiv	Fugitive emissions shall be controlled to prevent impact on such that no agricultural/ non-agricultural land.	Noted, Compliance assured.
	Impact to any land shall be mitigated and suitable compensation provided in consultation with the local Panchayat.	Compliance assured, if any such conditions arise.
xv	Hydrogeology of the area shall be reviewed annually from an institute / organization of repute to assess impact of surface water and ground regime (especially around ash dyke.) In case any deterioration is observed, specific mitigation measures shall be undertaken and reports / data of water quality monitored regularly and maintained shall be submitted to the Regional Office of the Ministry.	<ul> <li>The baseline Hydro-geological study at Lara project has been carried out through IIT, Roorkee. The study is being continued and reviewed annually from an institute/ organization of repute.</li> <li>The surface and ground water analysis is also being carried out through MOEF&amp;CC approved laboratory and monitoring reports are attached for reference.</li> </ul>
xvi	No ground water shall be extracted for use in operation of the power plant even in lean season.	In compliance. Raw water is sourced from Saradih Barrage of Mahanadi river as per the agreement with Chhattisgarh Water Resource Department (CGWRD) for all purposes & No groundwater is being used.
xvii	No water bodies (including natural drainage system) in the area shall be disturbed due to activities associated with the setting up/operation of the power plant.	Noted, Compliance assured.

xviii	Minimum required environmental flow suggested by the Competent Authority of the state Govt. shall be maintained in the Channel/ Rivers (as applicable) even in lean season.	Raw water is sourced from Saradih Barrage of Mahanadi river as per the agreement with Chhattisgarh Water Resource Department (CGWRD) and water drawl is being done in consultation with (CGWRD) to comply all applicable conditions. Saradih reservoir is under administrative Control of Chhattisgarh Water resource Department.
xix	COC of 5.0 shall be adopted	Complied.
xx	Regular monitoring of ground water level shall be carried out by establishing a network of existing wells and constructing new piezometers.	Complied. 13 nos. of piezometers for regular monitoring of ground water level in and around the ash pond areas and plant area as per stipulation have been constructed.
	Monitoring around the ash pond area shall be carried out particularly for heavy metals (Hg, Cr, As, Pb) and records maintained and submitted to the Regional Office of this Ministry. The data so obtained should be compared with the baseline data so as to ensure that the ground water quality is not adversely affected due to the project.	Base line monitoring for ground water quality is being already carried out through MoEF&CC recognized laboratory and the same will be continued. The records are being maintained and submitted to concerned regulatory authority regularly. Reports are being attached.
xxi	Monitoring surface water quality in the area shall also be regularly conducted and records maintained. The monitored data shall be submitted to the Ministry regularly. Further, monitoring points shall be located between the plant and drainage in the direction of flow of ground water and records maintained. Monitoring for heavy metals in ground water shall be undertaken.	<ul> <li>in the areas are being carried out by MOEF&amp;CC recognized laboratory and the same will be continued.</li> <li>The records are being maintained and submitted to concerned regulatory authority regularly.</li> <li>Reports are being attached.</li> <li>Monitoring for heavy metals in ground water is also being carried out and its records being submitted to concerned regulatory authority</li> </ul>
		regularly.
xxii	Waste water generated from the plant shall be treated before discharge to comply limits prescribed by the SPCB/CPCB.	
xxiii	The project proponent shall	Facility for Rainwater harvesting

	undertake rain water harvesting measures and shall develop water storage for use in operation of the plant. Rain water harvesting system shall be put in place which shall comprise of rain water collection from the built up	along with storage capacity created in Township as per availability of land. Rainwater harvesting system provided in township for rainwater
	and open area in the plant premises. Action plan for implementation shall be submitted to the Regional Office of the Ministry.	collection and 13 pits provided for groundwater recharge. Ground water recharge centers have been constructed as per rainwater harvesting scheme in our plant area & township area.
xxiv	Additional soil for leveling of the proposed site shall be generated within the site (to the extent possible) so that natural drainage system of the area is protected and improved.	In compliance.
XXV	Common property resource falling in the vicinity of the project area shall be identified and if any common property resource (such as grazing land, pond etc.) is falling within the plant area and is unavoidable by its sheer location, an equal area shall be first developed and handed over to the community.	Complied. Development of common property resource has already been included in R&R plan and CSR Activities.
xxvi	The project proponent need to ensure that poor villagers (particularly landless farmers) are further not marginalized. Accordingly, identification of landless farmers shall be carried out from records of Revenue Department/ District Agricultural Office, collected and appropriate scheme for sustainable livelihood scheme shall be devised and audited report sent to the concerned Department from time to time.	Complied. These aspects have already been included in R&R Plan and implemented.
xxvii	The project proponent shall ensure compensation to the land oustees and also formulate scheme in consultation with the State Govt. for immediate implementation of sustainable welfare	The said stipulations has already been complied in accordance with the approved R&R Plan.

xxviii	measures for marginalized landless farmers whose sustenance were indirectly dependent on the land now proposed for the power project and not owned by them. The project proponent shall also adequately contribute in the development of the neighboring villages. Special package with implementation schedule for providing potable drinking water supply in the nearby villages and schools shall be undertaken in a time bound manner.	Development of neighboring villages has been covered under Rehabilitation Action Plan and Community Development activities planned under Corporate Social Responsibility. The activities include development of concrete roads with drains, infrastructure facilities in schools, hand pumps and wells, Water supply facilities in affected villages, renovation and rehabilitation of water bodies/ ponds, water shed development etc.
xxix	CSR scheme shall be undertaken based on need based assessment in and around the villages within 5 km of the site and in constant consultation with the village Panchayat and the District Administration. As part of CSR employment of local youth after imparting relevant training as may be necessary shall be undertaken as committed.	committee has representatives of all nearby villages, State Government,
xxx	An amount of Rs 38.0 Crores shall be earmarked as one-time capital cost for CSR program as committed by the project proponent. Subsequently a recurring expenditure of Rs 7.65 Crores per annum till the life of the plant shall be earmarked as recurring expenditure for CSR activities. Details of the activities to be undertaken shall be submitted within six months along with road map for implementation.	The details of CD/CSK works undertaken has been attached The condition has been deleted through EC amendment dated 21.10.2020.
xxxi	It shall be ensured that an in-built monitoring mechanism for the CSR	

	schemes identified is in place and annual social audit shall be got done from the nearest government institute of repute in the region. The project proponent shall also submit the status of implementation of the scheme from time to time. The achievements should be put on company's website.	INDIAN INSTITUTE OF CORPORATE AFFAIRS (IICA). Monitoring of work is done by Site-R&R, RHQ-R&R, Corporate-R&R and CSR department (Headed by Executive Director). Report of works done under CSR/CD has been attached. There is three tier in-house monitoring mechanism in NTPC. Monitoring of work by Site-R&R (headed by AGM), RHQ-R&R, Corporate-R&R and CSR departments (headed by Executive Director).
xxxii	Green Belt consisting of 3 tiers of plantations of native species around plant not less than 100m width shall be raised (except in areas not feasible). The density of trees shall not less than 2500 per ha with survival rate not less than 80%.	<ul> <li>a) Green belt developed. Additional Plantation is being done by engaging local people and through contracts awarded to Chhattisgarh Rajya Van Vikas Nigam Limited in the land available in Plant, Township and ash dyke area as per final layout of St- I.</li> <li>b) Total 3.37 Lakh trees have been planted till date. Out of which 0.20 Lakh trees</li> </ul>
		which 0.20 Lakh tree plantation has been done in 2023-24. c) A total Rupees 11.07 crores have been deposited under Hariyar Chhattisgarh scheme
		of Chhattisgarh State Government by NTPC Lara. A total 2.72 Lakh tree saplings have been planted under above program till date.
xxxiii	An Environmental Cell shall be created at the project site itself and shall be headed by an officer of appropriate seniority and qualification. It shall be ensured that the Head of the Cell shall directly report to the Head of the Organization.	In compliance.

#### **B.** General Conditions:

	eneral Conditions:	
tl b tl n v	he prescribed standards only shall be re- circulated and reused within he plant. Arrangements shall be nade that effluents and storm vater do not get mixed.	
p ti	A sewage treatment plant shall be provided (as applicable) and the reated sewage shall be used for raising green belt/ plantation.	MBBR Technology based Sewage Treatment Plant of 1.7MLD capacity is operational. Entire STP effluent is treated conforming to prescribed standards and is being utilized for plantation & raising greenbelt.
p c ir s n v s t	Adequate safety measures shall be provided in the plant area to check/minimize spontaneous fires in coal yard, especially during summer season. Copy of these measures with full details along with location plant layout shall be submitted to the Ministry as well as to the Regional Office of the Ministry.	Complied, 460 numbers fire hydrants provided in the entire power station including Coal yard.
iv S fi b c E S	Storage facilities for auxiliary liquid fuel such as LDO/HFO/LSHS shall be made in the plant area in consultation with department of Explosives, Nagpur. Sulphur content in the liquid fuel will not exceed 0.5%.	License for storage of LDO has been obtained from Department of Explosives, Nagpur vide license number P/HQ/CG/15/712(P373361) dated 16.12.2016 valid till 31.12.2027. Being Complied.
p c	Disaster Management Plan shall be prepared to meet any eventuality in case of an accident taking place due to storage of oil.	A detailed Disaster Management Plan is prepared and finalized in consultation with Department of Explosives, Nagpur and regular mock drills are being conducted quarterly as per plan in order to address any eventuality in case of an accident.
a d	First Aid and sanitation arrangements shall be made for the drivers and other contract workers during construction phase.	Noted, Compliance assured. A first aid Centre is established to provide immediate medical aid to the workers and their family members since 26.09.2014. A 24hour ambulance is in service at site for emergent requirements.
		All arrangements related to first aid

		health & safety and sanitation for contract workers during construction
		phase of the project was kept under the EPC contract. However, NTPC has effectively complied the said stipulation.
		Various measures implemented during construction phase through contractor during construction phase were:
		Adequate infrastructure facilities, such as sanitation, fuel, restroom, medical facilities, safety, and suitable water supply has been provided to the labor colonies housing the work force during construction phase of the project. Safety equipment such as earplugs
		and earmuffs, helmets, face shields, safety goggles etc. also has also been provided to workers engaged in high risk areas.
vi	Noise levels emanating from turbines shall be so controlled such that the noise in the work zone shall be limited to 85dB (A) from source. For people working in the high noise area, requisite personal protective equipments like ear plug/ear muff etc shall be provided. Workers engaged in noisy areas	Complied. Base line monitoring for Noise level is being already carried out through MOEF&CC recognized laboratory and the same will be continued. Personal Protective Equipment (PPE's) are also being provided to personnel
	such as turbine area, air compressors etc shall be periodically examined to maintain audiometric record and for treatment for any hearing loss including shifting to non noisy/less noisy areas.	working in high noise areas. Periodic examination of workers also being done as stipulated.
vii	Regular monitoring of ambient air ground level concentration of SO <sub>2</sub> , NOx, PM <sub>2.5</sub> & PM <sub>10</sub> and Hg shall be carried out in the impact zone and record maintained. If at any stage these levels are found to exceed the prescribed limits, necessary control measures shall be provided immediately. The location of the monitoring stations and frequency of monitoring shall be decided in consultation with SPCB. Periodic	Four numbers of CAAQMS station are provided and the locations of AAQMS were finalized in consultation with CECB. Regular monitoring of ambient air quality, ground level concentration of SO <sub>2</sub> , NOx, PM <sub>2.5</sub> & PM <sub>10</sub> and Hg is being carried out through MOEF&CC recognized laboratory and records are being maintained and submitted. Ambient air quality reports are enclosed.

	data shall also be put on the website of the company.	
VIII	Provision shall be made for the housing of construction labor (as applicable) within the site with all necessary infrastructures and facilities such as fuel for cooking, mobile toilets, mobile STP, safe drinking water, medical health care, crèche etc. The housing may be in the form of temporary structure to be removed after the completion of the project.	A labour colony with necessary infrastructure facilities such as housing, sanitation, mobile toilet, fuel, medical facilities, safety, drinking water supply etc. has been provided for construction labour. The same has been kept under the scope of EPC contractor. Further, NTPC is ensuring effective compliance of the said stipulations.
ix	The project proponent shall	Complied.
	advertise in at least two local news papers widely circulated in the region around the project, one of which shall be in the vernacular language of the locality concerned within seven days from the date of this clearance letter, informing that the project has been accorded environmental clearance and copies of clearance letter are available with the State Pollution Control Board/ Committee and may also be seen at Website of the Ministry of Environment and Forests at http://envfor.nic.in.	2. Kelo Pravah on 18.12.2012.
X	A copy of the clearance letter shall be sent by the proponent to concerned Panchayat, Zila parishad/ Municipal Corporation, urban local body and the Local NGO, if any, from whom suggestions/representations, if any, received while processing the proposal. The clearance letter shall also be put on the website of the Company by the proponent.	The clearance letter is also available on website of NTPC <u>https://www.ntpc.co.in/about-</u> <u>us/corporate-</u>
xi	The proponent shall upload the status of compliance of the stipulated environmental clearance conditions, including results of monitored data on their website and shall update the same periodically. It shall simultaneously be sent to the Regional Office of MOEF, the respective Zonal Office of CPCB and the SPCB. The criteria	Status of compliance of the stipulated environmental clearance conditions uploaded on the NTPC website. <u>https://www.ntpc.co.in/about- us/corporate-</u> <u>functions/environment/status-hyc-</u> <u>reports</u> The latest and updated Half Yearly

	pollutant levels namely; SPM, RSPM ( $PM_{2.5} \& PM_{10}$ ), SO <sub>2</sub> , NOx (ambient levels as well as stack emissions) shall be displayed at a convenient location near the main gate of the company in the public domain.	Compliance (HYC) report of EC conditions is regularly being submitted to the Regional Office of MOEF&CC, IRO, Raipur, CPCB Zonal Office & CECB. The display for criteria pollutant levels at a convenient location near the main gate of NTPC Lara STPS has been done for Stack emissions and ambient air.
xii	The environment statement for each financial year ending 31 <sup>st</sup> March in Form-V as is mandated to be submitted by the project proponent to the concerned State Pollution Control Board as prescribed under the Environment (protection) Rules, 1986, as amended subsequently, shall also be put on the website of the company along with the status of compliance of environmental clearance conditions and shall also be sent to the respective Regional Offices of the Ministry by e-mail.	for financial year ending 31 <sup>st</sup> March in prescribed Form-V has been
xiii	The project proponent shall submit six monthly reports on the status of the implementation of the stipulated environmental safeguards to the Ministry of Environment and Forests, its Regional Office, Central Pollution Control Board and State Pollution Control Board. The project proponent shall upload the status of compliance of the environment of the environmental clearance conditions on their website and update the same periodically and simultaneously send the same by email to the Regional office, Ministry of Environment and Forests.	The half yearly compliance report is being regularly submitted to the concerned statutory authority. The status of compliance of the environmental clearance conditions uploaded on NTPC website and update the same periodically. <u>https://www.ntpc.co.in/about- us/corporate- functions/environment/status-hyc- reports</u> The latest six monthly progress report for the period of October, 2023 to March, 2024 is being submitted
xiv	Regional office of the Ministry of Environment & Forests will monitor the implementation of the	including Environmental Impact

	stipulated conditions. A complete set of documents including Environmental Impact Assessment Report and Environment Management plan along with the additional information submitted from time to time shall be forwarded to the Regional Office for	Management Plan along with the additional information/ clarifications as submitted to MOEF&CC have been forwarded on 11.07.2013 to the Regional Office of MOEF&CC. Project proponent has uploaded the compliance status in the company
	their use during monitoring. Project proponent will up-load the	website and is being updated the same on six monthly basis.
	compliance status in their website and up-date the same from time to time at least six monthly basis. Criteria pollutants levels including NOx (from stack & ambient air) shall be displayed at the main gate of the power plant.	https://www.ntpc.co.in/about- us/corporate- functions/environment/status-hyc-reports
XV	Separatefundsshallbeallocatedforimplementationof	Item-wise break-up for implementation of environmental
	environmental protection measures along with item-wise break-up. These cost shall be included as part of the project cost. The funds earmarked for the environment protection measures shall not be diverted for other purpose and	protection measures along with status of expenditure is enclosed. Separate funds have already been allocated for implementation of environmental protection measures and the same will not be diverted for other purpose.
	year-wise expenditure should be reported to the ministry.	
xvi	The project authorities shall inform the Regional Office as well as the Ministry regarding the date of financial closure and final approval of the project by the concerned authorities and the dates of start of land development work and commissioning of plant.	considered as the date of financial closure. The Commercial operation of Unit#1 (800 MW) started on 01.10.2019 and of Unit#2 (800 MW) started on 07.11.2020.
xvii	Full cooperation shall be extended to the Scientists/officers from the Ministry/ Regional Office of the Ministry/ CPCB/ SPCB who would be monitoring the compliance of environmental status.	Noted, Compliance assured.
5.	The Ministry of Environment and Forests reserves the right to revoke the clearance if conditions stipulated are not implemented to the satisfaction of the Ministry. The Ministry may also impose additional environmental conditions or modify the existing ones, if necessary.	Noted.

		<u>ر</u> ــــــــــــــــــــــــــــــــــــ
6.	The environmental clearance	Noted.
	accorded shall be valid for a period of 5 years to start operations by	
	the power plant.	
7.	Concealing factual data or	Noted
<i>,</i> ,	submission of false/fabricated data	
	and failure to comply with any of	
	the conditions mentioned above	
	may result in withdrawal of this	
	clearance and attract action under	
	the provisions of Environment	
	(Protection) Act, 1986.	Natad
8.	In case of any deviation or	NOTED.
	alteration in the project proposed including coal transportation	
	system from those submitted to	
	this Ministry for clearance, a fresh	
	reference should be made to the	
	Ministry to assess the adequacy of	
	the condition(s) imposed and to	
	add additional environmental	
	protection measures required, if	
	any.	Natad
9.	The above stipulations would be enforced among others under the	Noted.
	Water (Prevention and Control of	
	Pollution) Act, 1974, the Air	
	(Prevention and Control of	
	Pollution) Act, 1981, the	
	Environment (Protection) Act, 1986	
	and rules there under, Hazardous	
	Wastes (Management, Handling &	
	Transboundary Movement) Rules,	
	2008 and its amendments, the	
	Public Liability Insurance Act, 1991 and its amendments.	
10.	Any appeal against this	Noted.
10.	environmental clearance shall lie	
	with the National Green Tribunal, if	
	preferred, within 30 days as	
	prescribed under Section 16 of the	
	National Green Tribunal Act, 2010.	

### EC Amendment dated 14.01.2020

Sr. No.	Description	Status of Implementation (As on 31.03.2024)
C	oal transportation by road	
i)	The quantities	Coal Transportation by road has been permitted

	transported from each route, mode and length of transportation, and total quantities transported daily-wise against the permitted quantity of each route as per the permission issued by the Ministry and power generation in terms of PLF/Units shall be submitted to the ministry as part of six monthly compliance report. These quantities will be examined by the EAC during further extension based on which a decision will be taken.	provisions are in compliance.
ii)	Progress (Physical and financial) of MGR laying from Talaipalli mine to Lara Power Plant shall be submitted.	
iii)	At least two water sprinklers on each route shall be deployed for dust suppression continuously during transportation. The number of sprinklers used and the quantity of water (in KLD) sprinkled daily shall be reported as part of six monthly compliance report.	Two water sprinklers(3KLD per tanker) each have been deployed for coal transportation from NTPC Talabira mines in the route Talabira to NTPC Lara for dust suppression continuously during transportation. Quantity of water (in

#### Monitoring the Implementation of Environmental Safeguards Ministry of Environment & Forests& Climate change Regional Office (West Central Zone), Nagpur Monitoring Report PART – I DATA SHEET

	<b>B</b> 7(1)(	
S. No.		
1.	Project type: River-valley / Mining / Industry / Thermal / Nuclear / other (specify)	Thermal
2.	Name of the project	Lara Super Thermal Power Station, Stage-I (2x800 MW)
3.	Clearance letter (s)/ OM no and date	No.J-13012/79/2007-IA.II(T) dated 13/12/2012.
4.	Location a) district (s) b) state (s) c) latitude/longitude	District: Raigarh, State: Chhattisgarh. 21o 45' N/ 83o 26' E
5.	Address for correspondence a) Address of the Concerned Project Chief Engineer (with PIN Code & Telephone/ Telex/ Fax No.)	EXECUTIVE DIRECTOR, NTPC - Lara STPS, Lara Super Thermal Power Station, Village: Chhapora, PO+PS: Pussore District- Raigarh (Chhattisgarh) PIN Code- 496 440 E-mail: faxforntpclara@gmail.com
	<ul> <li>b) Address of the Executive Project Engineer/ manager</li> </ul>	GM (O&M), NTPC - Lara STPS, Lara Super Thermal Power Station, Village: Chhapora, PO+PS: Pussore District- Raigarh (Chhattisgarh) PIN Code- 496 440
6.	Salient features a) of the project	Lara STPS is a coal based super thermal power project based on supercritical technology.
	b) of the environmental management plans	Please refer Chapters 2 of the EIA Report.
7.	Breakup of the project area	
	<ul> <li>a) submergence area: forest &amp; non-forest</li> </ul>	As the proposed project is a coal based super thermal power project, no submergence area is involved.
	b) others	An area of 1035.59 Ha. is being acquired for Main plant, Township and ash disposal areas of

		the project, which includes 811.8 Ha of Private Land, 72.03 Ha. of Govt. Land and 151.762 Ha. of Revenue Forest Land.
8.	Breakup of the project affected population with enumeration of those losing houses/dwelling units only agricultural land only, both dwelling units & agricultural land & landless labourers/artisan a) SC, ST/ Adivasis b) Others (Please indicate whether these figures are based on any scientific and systematic survey carried out give details and years of survey)	<ul> <li>A detailed Socio-economic Survey of land being acquired has been undertaken. The details PAPs is as follows:</li> <li>Total No. of PAPs: <ul> <li>No. of SC/ ST/ Adivasi PAPs: 1022( Approx)</li> <li>No. of Homestead Oustees: 17 (Approx)</li> <li>No. of Land Oustees: 2200 (Approx)</li> <li>No. of Land + Homestead Oustees: 2217 (Approx)</li> <li>No. of Landless Labourers/ Artisans: 250 (Approx.)</li> </ul> </li> </ul>
9.	Financial details: a) Project cost as originally planned and subsequent revised estimates and the year of price reference	Rs. 17869.00 Crores
	<ul> <li>b) Allocation made for environment plans with item wise and year wise break- up.</li> </ul>	Rs 1309.98 Crores (Break-up given in. Annexure-I).
	<ul> <li>c) Benefit cost ratio/Internal rate of Return and the year of assessment</li> </ul>	The project is at initial stage of commissioning & operation please.
	<ul> <li>d) Whether © includes the cost of environmental management as shown in the above</li> </ul>	
	<ul> <li>e) Actual expenditure incurred on the project so far</li> </ul>	Rs.17058.00 Crores
	<ul> <li>f) Actual expenditure incurred on the environmental management plans so far</li> </ul>	Rs. 1160.79 Crores
10.	Forest land requirement a) the status of approval for diversion of forest land for non-forestry use	The project involves 151.762 Ha of Revenue Forest land. The complete Revenue Forest Land diversion has been done in name of NTPC, Lara

	b) the status of clearing felling	Tree felling plan approved and executed by the forest department.
	<ul> <li>c) the status of compensatory afforestation, if any</li> </ul>	Plan for compensatory afforestation has already been approved and the amount of the compensatory afforestation is deposited in the CAMPA fund of the forest department.
	<ul> <li>d) comments on the viability &amp; sustainability of compensatory afforestation programme in the light of actual field experience so far</li> </ul>	Plan for compensatory afforestation has already been made in consultation with State Forest Department and the same shall be implemented by State Forest Department.
11.	The status of clear felling in non- forest areas (such as submergence area of reservoir, approach roads), if any with quantitative information	As the proposed project is a coal based super thermal power project, no submergence area is involved.
12.	Status of construction a) Date of commencement (Actual and/ or planned)	a) Site leveling package awarded on 20.02.2013.
	<ul> <li>b) Date of completion (Actual and/ of planned)</li> </ul>	<ul> <li>b) U#1 commercial operation start date is 01.10.2019. U#2-commercial operation started on 07.11.2020.</li> </ul>
13.	Reasons for the delay if the project is yet to start	Not Applicable
14.	Dates of site visits aThe dates on which the project was monitored by Regional office previous occasion, if any	Regional officer of CECB Raigarh, official visited site for inspection on 05.06.2018. Regional Ofiice, CECB, Raigarh officials visited
	b.Date of site visit for monitoring report.	NTPC, Lara site on 17.12.2019 and 27.01.2020.
		Regional Ofiice, CECB, Raigarh officials visited NTPC, Lara site on 21.10.2020.
		Regional Ofiice, CECB, Raigarh officials visited NTPC, Lara site on 09.04.2021.
		Regional Ofiice, CECB, Raigarh officials visited NTPC, Lara site on 11.04.2022.

15	Details of correspondence with	
	project authorities for obtaining	
	action plan/information on status of	NIL
	compliance to safeguards other	
	than the routine letters.	
	For logistic support for site visit.	
	(The monitoring report may obtain	
	the details of all the letters issued	
	so far but the later reports may	
	cover only the letters issued	
	subsequently)

# **Radioanalytical Laboratory**

**RADIOACTIVITY TEST CERTIFICATE** 

#### Ref: BRIT/RAL/DOM/823-838/MISC/598-613/23-24

M/S. NTPC LTD (LARA) 1047 LARA SUPER THERMAL POWER PROJECT VILLAGE. CHHAPORA, PO PUSSORE, DIST.RAIGARH, C.G. PIN 496440

This is regarding the sample of "COAL, BOTTOM ASH & FLY ASH"sent for radioactivity analysis vide your letter ref. no. LARA/O&M/CHEM/2747 dated 07.12.2023 with the following details as shown in italics:

Sr. No	NAME OF THE SAMPLE	SAMPLE I.D.	DATE OF SAMPLING	TOTAL BULK QUANTITY FROM WHICH SAMPLE IS DRAWN
1	COAL SAMPLE-1	NTPC TALAIPALI RAKE	30/11/2023	300 KG
2	COAL SAMPLE-2	NLC TALABIRA ROAD	30/11/2023	300 KG
3	BOTTOM ASH	BOTTOM ASH U#1	30/11/2023	250 KG
4	FLY ASH	FLY ASH U#1	30/11/2023	250 KG

#### DATE OF RECEIPT OF SAMPLE: 22.12.2023

DATE OF COMPLETION OF TEST: 21.01.2024

The samples were analysed for U-238, Th-232, Ra-226 and K-40 radioactivity content by HPGe gamma spectrometry and the values obtained are as follows:

Sr. No	SAMPLE	U-238 (Bq/Kg)	Th-232 (Bq/Kg)	Ra-226 (Bq/Kg)	K-40(Bq/Kg)
1	COAL SAMPLE	17.7 ± 0.6	23.8 ± 2.4	$19.4 \pm 1.7$	$102 \pm 4.8$
2	COAL SAMPLE-2	24 ± 0.8	31.1 ± 1.3	25.4 ± 2.0	56.8 ± 3.5
3	BOTTOM ASH	45.5 ± 1.0	60.6 ± 2.3	45.9 ± 2.5	$182 \pm 6.1$
4	FLY ASH	$42.5 \pm 1.0$	62.4 ± 5.3	43.7 ± 2.3	249 ± 6.9

Opinion: The measurement values are below the clearance level for radionuclides of natural origin in bulk solid materials, as per AERB directive 01/2010 (table-3) dated 26/11/2010.

Note: (i) The report pertains to the given sample only. (ii) The sample will be retained in this laboratory for a period of 1 month from certificate date and thereafter it will be disposed off. (iii) This report shall not be reproduced except in full, without written approval of the laboratory. (iv) The sampling is not done by this laboratory.

Dear Sir,

This has reference to our above mentioned NIT, Your offer and subsequent discussions. We are pleased to accept your offer opened on 22.08.2020 and confirm having awarded on you the work of Conducting SIE and NAS for NTPC LARA of total value INR 1,124,500.00 (Rupee ELEVEN LAKH TWENTY-FOUR THOUSAND FIVE HUNDRED ONLY) mentioned in the scope of works, special terms & conditions, Bill of quantities etc.

The duration of the service period shall be from 20.11.2020 to 19.05.2021. Though the duration of contract shall remain same, the actual date of commencement of the contract shall be as per the direction of EIC. Sh Shakil Ahmed, Sr.Manager (LA/R&R) shall be EIC for this work.

This service purchase order along with its annexure is being issued to you in duplicate .We request you to return the duplicate copy of this service purchase order, duly signed on each page by your authorised signatory in token of your unequivocal acknowledgment of the same within 15 days from the date of this service purchase order. If no communication is received within 15 days of receipt of Purchase Order, it will be treated that order has been accepted in entirety.

We thank you for the interest shown by you in our project and the cooperation extended to us. We expect to receive your continued cooperation in future also.

Thanking You, For & on behalf of NTPC Limited.

Sr.Manager(C&M)

Please note that below documents are needed to be provided along with Invoice.          S.No.       Document Description
S.No.       Document Description

#### NTPC VENDOR PAYMENT PORTAL & PAYMENT PROCEDURE

1.For all the cases where payment documents are to be directly submitted to NTPC (excluding Payment through Bank cases), the Invoice and supporting document(s) as required in the Purchase Order have to be Digitally Signed with class II or III digital signature and uploaded in the NTPC Vendor Payment Portal https://pradip.ntpc.co.in/VendorFinal/Login.jsp.

In such cases, there will be no requirement of physical copy of invoice & documents except for Lorry Receipts (LRs)/ Delivery Challan, which are normally sent along with the material/ transporter. Bank Guarantees to be sent in original wherever applicable.

**2.**From **15.5.2020**, NTPC will accept only digitally signed Invoice & supporting documents from Vendors for direct payment cases. Submission of documents in physical form shall not be accepted by NTPC unless otherwise asked for in the PO.

For such cases of physical submission, Vendors are required to send complete set of documents including invoice etc. addressed to the "Invoice Receipt Center" of the Delivery/ Invoicing Address as mentioned in the Purchase Order Annexure 1/ BOQ Sheet.

While submitting the Invoice/ Bills & related documents in physical form, Vendors are required to mention the following details on the top of the envelope:

- a. Invoice/Bill reference No.
- b. NTPC PO No./ Package no.
- c. NTPC Vendor Code asper PO

In addition to above, vendors are requested to mention their correspondence E-mail & Mobile No.in the Covering Letter, through which invoice processing related information/clarification request may be sent.

**3.**Vendors can track / monitor the status of payments from the Vendor payment portal. Help documents are available in the portal. Vendors are requested to make full use of the Vendor Payment Portal.

**4.** A toll-free helpline (1800 102 5970, operating times 9am to 6 pm to Mon to Sat except Holidays) is also available for help on digital invoice uploading & payment tracking.

5. For payment cases through bank, all original documents are to be submitted in bank as per terms of PO.

#### **Executive Summary**

In the present study entitled: 'Need Assessment Survey cum Social Impact Evaluation of National Thermal Power Corporation (NTPC), Lara presents the findings of the ten neighbouring villages of the stations. Lara Super Thermal Power Project is located in the Raigarh District in the Indian state of Chhattisgarh.

A mixed-method of qualitative and quantitative research approach was used for the assessment. The field surveyors collected both Primary and secondary for the survey. Primary data was collected by conducting extensive fieldwork in all the ten villages of Chhattisgarh. The IICA used a sample size of 366 households. The primary data collection exercise covered 366 households, 30 focus groups discussions, and 11 interviews with key informants. The secondary data was collected from government records, dashboards reports and the census of India. Out of the total household survey respondents, 49 per cent were females and 50 per cent males. The majority of the population in these villages speaks Hindi and local dialect. These villages had a high percentage of people belonging to the OBC (57%), SC (20%) and ST (19%) category.

The area is primarily dependent upon agriculture and allied activities. In the study area, 81 per cent of respondents are engaged in agriculture and allied activities as their primary occupation, 16 per cent work in the service sector in both government and private organisations.

The needs are grouped and classified under various categories in accordance with the CSR policies. The broad areas are Education, Healthcare, Skill Development Training, Water, Sanitation and Hygiene and Rural Infrastructure.

Prior to starting any CSR-CD intervention, it is recommended that need assessment, baseline studies are conducted. The program design involves critical needs assessment, resource mapping, and participatory planning with the communities to ensure their involvement and ownership in the long run. The interventions are in line with the Sustainable Development Goals and Schedule VII of the Companies Act, 2013. Stakeholder consultations should be done to include their needs and concerns in the projects at the beginning itself. Moreover, interventions should be thoroughly discussed in the Gram Sabha and suggestions coming out of Gram Sabha should be considered. A record of the consultations should be maintained.

After analysing the impact of the intervention implemented by NTPC Lara, Theme wise recommendations at the village level are chalked out specific to the needs of the people. The needs of the people are identified after through field survey and assessment of the projects in the area. From the identified needs, recommendations and new projects are suggested by IICA in the area of skill development, healthcare, agriculture, drinking water and rural infrastructure. Theme-wise, recommendations are given below.

In the area of Skill Development, it was found that an average of 5 per cent of the village population was unemployed. Moreover, 16 per cent of the population does not have a sustainable source of livelihood for 365 days a year. The respondents from the villages stressed that a lack of permanent sources of employment is not available in the nearby areas. To fulfil employment-related needs, NTPC can design a project that can be linked with government programs, or NTPC can collaborate with organisations that provide training to the youth. NTPC can focus on training people in the industrial sector present in the areas such as the silk industry. Vocational training in the IT sector is also suggested. The people also ask for training in the IT sector in the villages.

In the area of Agriculture, it was found that 97 per cent of the landowners used their lands for farming. The primary crop grown in the area was Rice. The farmers were dependent on rainwater for cultivation. Eighty-four per cent of farmers said that the major issue that they are facing is lack of water for irrigation for farming.

NTPC can design and implement a drip irrigation intervention in the area. For economic use of water and soil water retention capacity, this intervention will allow farmers to cultivate both the farming seasons and not depend on the rainwater entirely.

In the area of education, 41 per cent of the woman respondents were found to be illiterate. Among the literate females (59%), a significant portion of 43 per cent of the women has no academic qualification. They are literates with no formal education. A total of only 6 per cent of women have higher education qualifications, where 6 per cent are undergraduates, and 5 per cent are Sr. Secondary pass outs. Remote classes through smartphone and tabs were recommended to improve the literacy of women living in rural areas. Courses taken from smartphone and tabs will also not disturb the daily routine of the women who are homemakers.

In healthcare, pregnant women and mothers in the villages had a very low level of awareness regarding basic sexual and reproductive knowledge and healthy practices. It was also found that ambulance services were not very efficient. The health facility was limited, and the sub-centres available for the village were not adequately equipped. The Anganwadi Centers had a poor infrastructure in few villages.

For improving maternal and child healthcare, NTPC can incorporate services that will cater to the needs of children and women in health care in the current mobile medical unit already run by NTPC Lara. Secondly, NTPC can repair the Anganwadi Centers and provide the basic amenities in the centre like toys for children, furniture and electric appliances Etc.

In the area of Drinking Water, except Chhapora (17%) Mahloi (12%), the rest of the eight villages had 0-4 per cent of piped drinking water. The need for a clean piped drinking water system was very evident and apparent. Eighty per cent of the respondents from the villages have asked for pipe drinking water interventions. As per the need, NTPC can fund the system of piped drinking water in the village. The project should be designed to keep the components of the NTPC CSR policy on potable drinking water in check. NTPC can also dovetail the 'Har Ghar Jal Scheme' of the Government of India by providing drinking water supply through pipelines to each household through elevated storage reservoirs in every village.

In the area of Rural Infrastructure, the need that arose after the field survey was improving the quality of education in the schools through smart classes. To work towards quality education, NTPC can put up smart classes in school one time installing of equipment and capacity building training of teachers will ensure news of teaching methods and improve the students overall academic results.

Moreover, repairing the Anganwadi Centers in the village are essential for better health outcomes of infants, pregnant women, mother and adolescent girls. Painting, installing smart TVs, and providing toys and furniture will improve the functionality of the centre. The intervention will eventually impact and improve the infant mortality and maternal mortality of the villages.

#### Introduction

In accordance with its mission of being a socially responsible corporate entity with a thrust on community development, NTPC aims to focus on implementing Community Development (CD) programmes in the affected/neighbouring villages around its operating stations. To accomplish this mission, it is imperative to carry out a Need Assessment Survey (hereafter, NAS) to identify the social, economic and cultural needs of the villages. The whole exercise aims to set up long-term CD priorities, which could be achieved within the specified time frame. Briefly, it's a way of assessing what the group or community members see as their most important needs for improving community life. The results of the survey guide for future action. Generally, the needs that are rated most important are the ones that get addressed on priority.

NAS/SIE is being conducted by the Indian Institute of Corporate Affairs (IICA) for NTPC. The IICA follows a systematic process for determining and addressing needs, or "gaps" between current conditions and desired conditions. This assessment would help to identify current conditions and desired services or outcomes. Following a systematic approach, the aim is to identify needs, prioritize the needs and suggest an intervention to bridge the gap(s).

The needs assessment/SIE is conducted at Lara Thermal Power Station which has identified 10 villages under the Raigarh district of Chhattisgarh for undertaking CSR-CD activities.

The present NAS/SIE report presents the following information as per the Terms of Reference:

- i) List of the villages covered under NAS/SIE and basis for it.
- Details of selected areas of community development, identification of key indicators in the selected area and comparison of it at National level, State level and District level.
- iii) The existing situation of these selected community development areas in the identified villages.
- iv) Assessment of Needs based on the identified indicators as above and including activities and fund requirement.

- v) Details of development plans of the various government agencies (both Central and State) and Panchayats including the availability of funds.
- vi) Identification of gaps between the needs and government programmes and list of activities/programmes that could be taken up by the NTPC in line with its CSR-CD policy.
- vii) Recommendation for prioritizations of CSR-CD programmes/activities over the next 5 years.

#### **Research Methodology**

The study uses quantitative as well as qualitative methods and uses primary and secondary data to assess the needs of the target area. Primary data was collected by conducting extensive fieldwork in all villages. To conduct the need assessment study, IICA adopted the five-step approach as explained in Figure-1. The first step was to collate Secondary data from different government offices and websites. The second step was to prepare, pre-testing and finalization of Research Tools for the field survey. The third step was to form a survey team and prepare them for the field survey. Fieldwork in all the 10 villages and collection of primary data. As the fourth step, Focus Group Discussions (FGD) were held for the collection of qualitative information regarding the village. Fifth, data analysis of findings and preparation of the preliminary evaluation was done. The last step is the finalisation of the report and reporting of conclusions and recommendations.

Figure 1: Research Steps

#### Sampling

To select the sampling size, a confidence level of 95%, with a 5% margin of error was selected. Stratified random sampling is taken for the study. This sampling method was the best method for scrutinizing and collecting data. Mostly, villages consisted of diverse communities. To represent all the local communities of the village, an equal proportion to the village

population for the study sample was taken. The proportion was selected from various social categories that are General (24%), ST (10%), SC (16%) and OBC (49%) categories.

Table 1: Measuring of Sampling Siz	Table	: N	leasuring	of Sam	pling	Size
------------------------------------	-------	-----	-----------	--------	-------	------

Confidence Level	95%
Margin of Error	5%
Population Size	7315
Sample Size	366 (Household)

A total of 366 Household surveys were conducted in all the 10 villages. The household survey covered questions regarding the significant domains such as, education, infrastructure, health & sanitation and water. The aim of the survey is to explore and further analyse the attitude, knowledge and behaviour of the locals/communities.

#### **Data Collection**

The primary data was collected through household surveys, focused group discussions and key informant interviews. Secondary data was collected from the Census of India (2011) and official records of various offices like Primary Health Centres (PHC), Anganwadi Centres, Schools etc. apart from the data received from the NTPC office. Data collected through qualitative techniques like FGD and KII are analyzed through description and explanation. The specific objectives of NAS are described below<sup>1</sup>:

- i. To Prepare a Comprehensive target area profile. This consists of the following:
  - Demographic profile / Socio economic profile: total population, sex ratio, number of people in different age groups, like infants, children, adults, old aged, vulnerable group etc.
  - Quality of Life: Various Parameters on Households, etc.
  - Infrastructure available
    - a. Schools,
    - b. Roads
    - c. Health care facilities
    - d. Water, sanitation facilities
    - e. Electricity
    - f. Community Building,
    - g. Others
  - Knowledge, Attitude and Practices analysis (KAP)
    - a. Language and habits of communication
    - b. Cultural Characteristics: Traditions, Values and beliefs, etc.
    - c. Knowledge, attitudes and behaviors with respect to the development problem to be dealt.
  - Educational Status: Literacy, education, training and skills, and opportunities for all members of the society cutting across gender, age, caste and religion.
  - Health: Life expectancy, maternal and infant mortality rate, quality of life, and the level of health care available in the situation of morbidity.
  - Major historical events in the area in terms of social movements and of social upheaval and its long-term Need (if any) in the area.

<sup>&</sup>lt;sup>1</sup> TOR of NTPC

- Social problems: Crime, superstition, alcoholism, domestic violence, gender related Discrimination, caste related, etc.
- Occupation and employment (season wise): identify the particular context of each group, the season or the time of day when its members are available, the seasonal nature of their economic occupations, their physical setting, etc.
- Festivals and customs
- Natural resources.
- Existing development programs and its impact.
- Others: Any other Govt. schemes being implemented in target community.
- To assess the extent of the activities taken in Rehabilitation & Resettlement Plan (R&R Plan) / Rehabilitation Action Plan (RAP) and implemented as per NTPC records and project affected persons perspectives w.r t. Nos. of beneficiaries identified and avail the benefits as per R&R Plan / RAP.
- iii. Identify employment needs, scope of self-employment level of employment and agriculture development for higher economic growth and stability with predefined economic indicators, for example per capita income, expenditure, and savings etc. to assess the impact in the future.
- iv. To identify gender-wise critical educational, health, and recreation needs with specific social indicators like literacy, education, training and skills, and opportunities for all members of the society cutting across gender, age, caste and religion to evaluate the need in the future.
- v. To identify areas of interventions where community development activities can bring gender equality.
- vi. To identify the infrastructural needs of the target area and prioritize them based on Social Development Indicators.
- vii. To explore the opportunity of networking/partnerships with Govt. / Local bodies' plans

and intervention for spearheading overall development of the target area. Specifically, it will include the following.

- To take stock of the development plans prepared by any government agency for the area.
- To review the plan and the budget available under various central / state government schemes for development of the area.
- To identify the gaps between the plans of the government / local bodies / NTPC and the specified indicators/goals.

#### **Objective 1 - To Prepare a Comprehensive Target area profile**

#### **Demographic Profile**

Raigarh is a city located in the Chhattisgarh State; it is the district head quarter of Raigarh District. It is known as the cultural capital of Chhattisgarh because of its historical cultural activities. The district consists of a total of 9 Tehsil and 1445 villages. Raigarh is well known for its 'kosa' or tasar, a kind of fine silk created by the silkworm. The district also has a thermal power station belonging to the NTPC.

The Raigarh District has a total population of 150019. The district has a sex ratio of 953 females for every 1000 males, and a literacy rate of 87.02%. The total number of Male, female and children (0-6 Years) is 70197, 66929 and 16994 respectively.

The Need Assessment Survey/Social Impact evaluation has been conducted in 10 villages spread across the Raigarh district of Chhattisgarh. The total population of 10 villages is 7315 where the number of men is 3668 and of women is 3647 as per the 2011 census. The total number of households is 1906.

Village wise distribution is given in Table 2

Village Name	Total Households	Total Population	Male	Female	Children (0-6)	SC	ST
Armuda	153	540	259	281	48	118	69
Bodajharia	202	724	374	350	91	15	243
Chhapora	329	1219	589	630	116	128	229
Dewalsurra	159	566	88	71	21	29	113
Jhilgitar	39	159	289	277	51	118	11
Kandagarh	247	979	503	476	129	180	306
Lara	300	1290	379	354	86	9	0

Table 2: Demographic Details<sup>2</sup>

<sup>&</sup>lt;sup>2</sup> Based on Census of India, 2011

Mahloi	175	733	649	641	164	307	282
Riyapali	48	184	94	90	25	35	148
Kathani	254	921	444	477	87	231	124
Total	1906	7315	3668	3647	818	1170	1525

Figure 2 shows the number of people from Schedule Caste and Schedule Tribe.

Figure 2: Population of SC and ST<sup>3</sup>

A total of 29% of the village population belongs to the ST category. In the villages of Bodajharia (34%), Dewalsurra (71%) and Riyapli (97%), STs have a higher proportion than other villages. Population belonging to SC category is only 16 per cent. Villages like Armuda (22%), Chhapora (11%), Dewalsurra (18%), Jhilgitar (21%), Kandagarh (18%), Lara (24%), and Riyapli (19%) have more than 10% of population belonging to SC category.

<sup>&</sup>lt;sup>3</sup> Based on Census of India, 2011

#### Figure 3: Population of SC and ST

Figure 3 shows the number of people from Schedule Caste and Schedule Tribe after the field survey is completed.

After the data collection from the Gram Pradhan, it was found that in some villages there was an increase in the SC population. Villages like Amruda (37%), Dewalsurra (21%), Jhilgitar (22%), Lara (31%), Mahloi (5%), and Kathani (35%) saw an increase in SC population.

The ST population is more or less the same in all the villages.

#### **Quality of Life**

To assess the quality of life of the people living in these villages 6 indicators were taken into consideration.

#### **Drinking Water**

Drinking water facility is a basic need of the people. At the national level, only 20% of households have 100% piped water facilities. In the state of Chhattisgarh and Raigarh District, it

is 10% and 12% respectively. or the field survey, it was found that villages like Chhapora (17%) Mahloi (12%) has a pipe drinking water supply. The rest of the villages have 0-4 per cent of piped water facility. Piped drinking water supply is desired by the people living in the villages. Other than piped drinking water, people also have access to hand pumps (48%), borewells (54%) and tubewells (18%) as an improved source of drinking water

Figure 4: Percentage of households with Piped Drinking Water Facility

National, State, District and Villages

## Electricity

In India, 88 per cent of households have electricity connections. Both in Chhattisgarh and Raigarh district, 95 per cent of households respectively have electricity connections. In the study villages, most of the villages had 100% of households having electricity connection.

Figure 5: Percentage of households in the Villages having domestic electricity

The figure shows the percentage of households in the 10 villages that have domestic electricity connections.

National, State, District and Villages

In the project affected villages, 97% of households have domestic electricity. 3 out of 10 villages have 100 per cent level of domestic electricity connection. These villages are higher than the National (95%), State (95%) and District (95%) level of electricity connection<sup>4</sup>. Villages like Bodajharia (80%), Chhapora (90%), Kandagarh (76%) and Kathani (81%) have lesser households with domestic electricity connections than the district benchmark.

## **Population Having Shelter and Pucca Houses**

Housing has a positive impact on the overall standard of living of rural people. Figure 6 shows the percentage of pucca houses in the village. Villages like Amruda (85%) and Jhilgitar ((00%)) have a higher percentage of Pucca houses from the national benchmark ((76.7%)) and State benchmark ( $(58\%)^5$ ). The rest of the 8 village have lower percentage of Pucca Houses from the National Benchmark.

Figure 6: Percentage of Household having Pucca Houses

<sup>&</sup>lt;sup>4</sup> NFHS 4 Report

<sup>&</sup>lt;sup>5</sup> NSSO Survey, 2018-19 (76<sup>th</sup> Round)

National, State, District and Villages

In the villages, more than 95% of people have their own houses/shelter. Only 5% of the respondents did not own a house and were living on rent. The percentage of having shelter in the villages is higher than the state (89%) and district levels (78%).

Figure 7: Percentage of Population having Shelter

National, State, Distirct and Villages

#### **Population Having Toilet Facility**

The percentage of households having toilet facility of all the villages (84%) are higher from the National  $(63\%)^6$ , State (46%) and DIstrict  $(39\%)^7$  benchmark. Jhilgitar Village has 100 per cent households with toilet facility. Moreover, all the project villages have a higher percentage of households having toilet facility than from the control village (Kathani).

Figure 8: Percentage of Household Having Toilets

#### **Existing status of available Infrastructure**

To assess the existing status of basic amenities and infrastructure development, a field survey was conducted in all the 10 villages of Raigarh district. A village wise infrastructure table has been attached in annexure 3.

<sup>&</sup>lt;sup>6</sup> NSSO Survey, 2018-19 (76<sup>th</sup> Round)

<sup>&</sup>lt;sup>7</sup> NFHS 4 Report (Note – the district benchmark is before the Swachh Bharat Mission)

- School Infrastructure: In these 10 study villages there are 10 schools where we conducted school KII. 6 are primary school, 2 are Upper Primary (class either VI- VII or VIII) and 2 are Higher Secondary (highest class either XI or XII)
- Roads: Through Gram Panchayat KII it was found that out of 10 Gram Panchayats 9 said that they did have all-weather roads in the villages<sup>8</sup>
- Health care facilities: There is only one PHC serving these 10 villages. People of other 9 villages have to travel more than 5-10 km for healthcare facilities<sup>9</sup>. Anganwadi Centers are available in all the villages.
- Water, sanitation facilities: All the villages have improved source of water facilities such as handpumps, borewells and tubewells. Piped drinking water is available in few villages.
- Electricity: In these 10 villages, 95% of households had access to electricity. All the villages get electricity for more than 6 hours<sup>10</sup>.
- Community buildings: There are community buildings in only 05 villages out of 10 villages.
- Drainage: Out of 10 Gram Panchayat, it was found that only 2 Gram Panchayat (Jhilgitar and Kathani) had a drainage system.

# Knowledge, Attitude, Practices Analysis (KAP)

- Language and Modes of Communication- The major languages spoken in the district of Raigarh is Hindi and Odia. The medium of instructions in the schools is Hindi.
- Cultural characteristics: traditions, values, beliefs, etc. Raigarh is known as the 'Cultural capital of Chhattisgarh', Raigarh is famous for its dance form "Kathak" (as Raigarh Gharana) and classical music. Credit goes to Maharaja Chakradhar Singh under whose patronage Raigarh flourished as a centre of art and culture. Every year on the occasion of festival Ganesh Puja, Chakradhar Samaroh is organized in Raigarh.

<sup>&</sup>lt;sup>8</sup> Gram Panchayat KII

<sup>&</sup>lt;sup>9</sup> Health KII

<sup>&</sup>lt;sup>10</sup> Household Survey

Chakradhar Samaroh is among the famous cultural festivals of Chhattisgarh known for its special music and dance performances that reflect the rich cultural heritage of the state. Dhokra Work (Bell metal) is a speciality of the district. There are Jharas tribes practicing Dhokra Work. This involves casting non-ferrous metals such as bell metal, bronze, and brass using lost-wax casting technique.

• Knowledge, attitudes and behaviors with respect to the development problem to be dealt: The people are not aware of many government schemes and benefits in various domains. An attitude towards firstly, identifying the developmental issues at village level has to be developed. They should be aware of their various agencies and support system present in the villages.

# Educational Status: Literacy, Education, training and skills, and opportunities for all members of the society cutting across gender, age, caste and religion

The Literacy rate of 7+ year olds in India is 73%<sup>11</sup>. In the state, it is 70% and in the district, it is 85%. In comparison to these benchmarks, 3 villages have literacy levels below 70%. These villages are Dewalsurra (69%), Lara (67%), and Riyapali (68%). The rest of the villages have higher literacy rates from National and State benchmarks.

Figure 9: Literacy Rate

The figure shows the literacy rate of the study villages in comparison to national, state, and district level.

<sup>&</sup>lt;sup>11</sup> Census 2011

Figure 10: Percentage of People with Education Qualification

In the area of education qualification, the data shows that most of the people in these villages have only been to schools. The highest percentage of people have had only education up to matriculation (16%). Only 4.37% population in these villages who have UG degrees and

5.91% have PG degrees. 25 per cent of the respondents are illiterate and 23 per cent have studied only upto primary school.

Figure 11 shows the gender-wise proportion of educational levels in the villages. The data shows the gender-wise proportion of educational levels in the villages. The women lag behind in the gender wise per cent of literates Overall, the male literacy rate (85%) in comparison to to the female literacy (64%) in the villages. However, there are higher percentage of females (10%) in the villages than males (7%) who have completed their education upto Higher Secondary.

In terms of social categories, people belonging to the general category (94%) has the highest number of literates followed by OBC (84%), ST (65%) and SC (54%). In higher education respondents belonging to the General Category had a higher number of graduates and postgraduates (29%), followed by OBC (23%). The other two categories are quite lower in terms of higher education indicator. Only 6 per cent of the SC population and 9 per cent of the ST population got higher education.

Figure 12: Social Category wise Educational Level

Social Catergory Wise Educational Qualification

In the area of Skill training only 5.53 of the total respondents have attended skill training programs. Table 3 shows the respondents from villages that have attended skill training programs in a span of 1 year.

Table 3: Percentage	of People	Attended Skill	<b>Training Programs</b>

S. No.	Villages	Male	Female
1.	Lara	13.63%	7.04%
2	Mahloi	13.33%	0%
3.	Chhapora	0%	5.55%
4.	Amruda	0%	25%
5.	Riyapali	0%	16.66%

# **Health Status**

Life Expectancy

The Life expectancy in Chhatisgarh is 65.2 years. For men, it is 63.7 years and for females it is 66.6 Years<sup>12</sup>. In rural areas, it is 63.2 Years.

# Maternal and Infant Mortality Rates

The number of infant and maternal deaths are given in the table below.

Table 4: Number of Infant and Maternal Deaths
---

Villages	Maternal	Deaths	(in	Infant	Deaths	(In
	Numbers)			Numbers)		
Armuda	0			0		
Bodajharia	0			0		
Chhapora	0			0		
Dewalsurra	0			0		
Jhilgitar	0			0		
Kandagarh	2			0		
Kathani	0			0		
Lara	0			0		
Mahloi	0			0		
Riyapalli	0			0		

Figure 13: Institutional Delivery

<sup>&</sup>lt;sup>12</sup> SRS Life table 2014-18

Figure 13 shows the institutional delivery of the villages in Raigarh District. The percentage of institutional delivery in all the villages are below the National (78%), State (70%) and District (84%) benchmark. The institutional deliveries in all the villages (43%) are less than the national. The reason being that there is only 1 PHC in Chapora Villages is far from other villages. Moreover, the tribals communities prefer their own community's midwife at the time of delivery. 38% of the village respondents have said that ambulance services are not very efficient and effective in the area.

Figure 14: Percentage of Children Immunized under ICDS

The figure 14 shows the children who are getting ICDS services in the villages.

Children Immunization in the villages (74.81) are higher than the National benchmark (61%). Out of 10 village, 7 Gram Panchayat that is Armuda (74%), Chhapora (81%), Jhilgitar (89%), Lara (80%) and Kathani (87%) have more percentage of 1 year old immunization than the district benchmark that is 68%<sup>13</sup>. Villages like Jhilgitar (89%), Chhapora (81%) and Kathani (87%) have the highest per cent of one-year-old children immunization in all the villages. The immunization of these children take place in Anganwadi Centers and PHC. It was found that 89% of the respondents take their children to Anganwadi Center for immunization

## **Availability of Health Facility**

All the villages have Anganwadi Centers in the village. 85% of the respondents have said that they take their child to Anganwadi Centers for Immunization. There is a PHC in Chhapora village which caters for the health needs of all the villages.

<sup>34</sup> 

<sup>&</sup>lt;sup>13</sup> Antyodaya Dashboard

# Crime and Social Problems: Crime, superstition, alcoholism, domestic violence, gender related Discrimination, caste related, etc

The major crimes that were found in the field survey were theft and crimes towards women such as harassment and snatching of belongings. Domestic violence is not very prominent in the area. When asked, women felt safe and secure in their houses. Atrocity against the marginalized section of the society is low in all the villages. Overall, there were not any major crimes in the study villages.

# Occupations and employment (season wise): Identify the Particular context of each group: the season or the time of day when its members are available, the seasonal nature of their economic occupations, their physical settings

In the 10 study villages it was found that the majority of the people in these villages are farmers (65%) and agricultural labourers (16%). Only 14.65 percent of respondents are working in the service sector as employees and skilled labourers.

S.No.	Occupation	Percentage
1.	Agricultural Labourer/ Cultivator on other's land	16.20%
2.	Animal Husbandry	1.03%
3.	Businessman	3.60%
4.	Farming on own land	64.52%
5.	Service Sector	14.65%

Table 5: Various Occupations of the People

Major crops that are grown in the area are rice, millets and pulses. The farmers grow crops in both the seasons depending on the soil fertility and water availability for cultivation. Agricultural Laborers work in the farms during the seasons and later look for other alternative source of earning. Women of the villages also work in farms. 60 per cent of the women work in their farms who own land. Only 15 per cent of the women comprises Agricultural labourers.

#### **Festivals and Customs**

The major festivals in the area are Ganesh Puja and Chakradhar Samaroh. The interim period of ten days is observed with devotion, worship and festivity. Apart from other ceremonial observation and joyous celebrations the occasion is marked with cultural programs consisting of Music, Dance and Drama performed every evening. This festival used to be celebrated by the ancestors of king Chakradhar Singh right from the time they made it their abode. They had, all of them, been very orthodox and had great faith in rituals and other religious observations.

Apart from these, Diwali, Eid and Holi are famous in this area. Chakradhar Samaroh is among the famous cultural festivals of Chhattisgarh known for its special music and dance performances that reflect the rich cultural heritage of the state.

#### **Natural Resources**

Raigarh district is blessed with Ram Jharna. According to History, Lord Ram once had been here during his Vanwas, and drank water from the water source. Hence the name Ram Jharna. It is a very good picnic spot. Holy dip in this Jharna on special and auspicious occasions is also popular in the district. The district is also popular for Gomarda Abhayaranya. It is a natural home for many rare wild animals like tigers, bears, etc.

#### **Government Programs and its impact**

There are various government programs and schemes that have been running in the target area through state and central government towards the welfare of the people. The schemes are of various domains like education, health, water and sanitation, rural infrastructure, skill development etc. These schemes have been impacted at the block level, state level and national level. There have been major improvements in all the sectors due to the government programs, however, there is still a long road to reducing the gaps. A list of various government programs and their impact has been attached in annexures 4. Objective 2 To assess extent of the activities taken in Rehabilitation & Resettlement Plan (R&R Plan) /Rehabilitation Action Plan (RAP) and implemented as per NTPC records and project affected persons perspectives w.r t. Nos. of beneficiaries identified and avail the benefits as per R&R Plan / RAP.

This section comprises the impact analysis of all the activities both in the short-term and long-term across thematic areas such as education, healthcare, drinking water, and rural infrastructure.

## **Impact of Education Projects**

NTPC Lara, under its educational intervention, provides infrastructural support like the renovation of school buildings and school furniture. They also provided stationery and merit scholarships to students.

**Impact:** Figure 15 presents the availability of infrastructures in the schools in the study area. The educational interventions resulted in the up-gradation of education institutions. It was found that the project villages have performed better in the electricity (6.6), toilets for students (6.8), Chairs and desk (6.6), Computer Labs (4.0), Science Labs (4.5), Ramps (7) and Incinerator for Sanitary pads (6.5). The ratings in Drinking Water (6.6), however, is lower than the rating of the control village  $(8.0)^{14}$ . Thus, NTPC's support to educational institutes built an efficient, effective and quality education system.

Figure 15: School Basic Infrastructure

<sup>&</sup>lt;sup>14</sup> School KII

**Need:** To improve the rating of Drinking water in schools, NTPC Lara can provide Water coolers for students and teachers in schools. NTPC can fund the installation and the school can later take care of maintenance of the dispensers.

## **Impact of Healthcare Projects**

NTPC Lara under healthcare intervention is running Mobile Medical Unit for the people in the 9 villages.

**Impact**: The intervention is impactful as 75% of respondents have said that the MMU is very helpful for them. The common diseases such as cold and cough, body ache, viral fever among Men, Women and Elderly are lower than in the control village. Figure 15 shows the comparison between the project villages and control villages in the area of common diseases in men, women and elderly.

Figure 16: Prevalence of Common Diseases

**Needs**: The common diseases in the project villages were equal to the control villages. The main reason behind these illnesses is malnourishment among infants and children. It was found that 20% of the children enrolled in Anganwadi centers are malnourished<sup>15</sup>. For children, NTPC Lara can incorporate maternal and child healthcare services to the MMUs to tackle the severely malnourished and moderately malnourished infants and children living in the villages.

### **Impact of Drinking Water**

Under the water projects, NTPC Lara provided a grant for installing the hand pumps, Water ATMs and Portable Water Arrangements.

**Impact:** After installation of Handpumps in project villages. The intervention has resulted in the reduced distance the people travel for accessing water for drinking and household purpose. Figure 17 shows the distance to reach the water source. It was found that the source of water available in the house (12%) is higher than in the control village (4%). The same goes for

<sup>&</sup>lt;sup>15</sup> Anganwadi KII

the water source that is near the premises were found higher in the villages (66%) than from the control village (56%)

Figure 17: Distance of Water Source from the Household

As observed in the FGDs, the women got improved quality of water. In the Project Villages, many women and girls expressed that they don't have to walk long to get water. Therefore, the intervention in drinking water has resulted in an improvement in the overall quality of life.

#### **Impact of Rural Infrastructure Projects**

In the area of rural Infrastructure, NTPC Lara has provided grants to construct all weather roads, repair and maintenance of community spaces, Construction of Community Hall and Panchayat Bhawan.

**Impact:** Figure 18 shows the Access to all weather roads in the project villages in comparison to control villages. Access to all weather roads have increased to 59 per cent in the villages which is very high from the vicinity village indicator (4%). Moreover, 93 per cent of the respondents have said that they have benefited from the rural infrastructure project taken by NTPC in their villages.

Figure 18: Access to All Weather Roads

Objective 3 Identify Employment needs, scope of self-employment – level of employment and agriculture development for higher economic growth and stability with predefined economic indicators, for example per capita income, expenditure, and savings etc. to assess the need in the future.

Employment and livelihood needs are major needs for people in rural areas. The field survey suggested that people in these study villages fall under 3 categories, employed, self-employed and unemployed. It was found that 14% of the people were unemployed in all the villages.

#### **Skill Development**

Employment is one of the critical issues in the rural communities and employment and livelihood needs are major needs for these communities.

Figure 19: Percentage of Unemployed people in the 10 villages

The figure 19 shows the status of employment of the 10 villages.

**Findings and Observations:** India's rural unemployment rate is 5.84% in the current year. Chhattisgarh unemployment rate is 8.4%<sup>16</sup>. In comparison to the national and state unemployment rate, the percentage of people unemployed are higher. 4 out of 9 villages have a higher percentage of people who are unemployed when compared with state unemployment rates.

At present, the percentage of unemployed people is not more than 11% in any of the villages. However, from the survey, it was found that 16% of the population does not have a sustainable source of livelihood for 365 days a year

Figure 20: Percentage of people having vocational training

Figure 20 shows the percentage of respondents that have been a part of vocational training sessions

**Findings and Observation:** It was found that a very small amount of respondents have been a part of vocational training. There are 5 villages where there had not been any person who

100%

<sup>&</sup>lt;sup>16</sup> CMIE Report

had received any skill development training. In the village of Amruda (7%), Chhapora (3%), Mahloi (11%), Lara (10%), and Riyapali  $(9\%)^{17}$ , the respondents told that there were training sessions that they were part of.

The respondents from the villages stressed that a lack of permanent sources of employment is not available in the nearby areas. People work as seasonal farmers in farming seasons. For the rest of the time, they have to look for employment in other domains. It was found that people are skilled in farming techniques, labour work. Gram Pradhan's of the villages suggested various skill development training like computer training, plumbing and electrician and stitching and sewing training for women. The respondents expressed their intent to attend technical training programmes for upskilling such as auto repair mechanic course; training programme on sports; training programme on stitching, beautician. Some discussion participants seek cottage based skills for livelihood generation such as soap making, small food processing businesses or agriculture residue processing.

Household survey data reveals that 59 per cent<sup>18</sup> of the respondents, both males and females have asked for employment through skill development training. Regarding modes of employment, people asked for skill development training and jobs at NTPC stations.

#### Recommendation

To fulfil employment-related needs NTPC may channelise many sources and implement a robust training mechanism that can help reduce unemployment among the youth. NTPC may design a project which can be either linked with government programs or NTPC can collaborate with organisations that provide training to the youth<sup>19</sup>. In the survey, it was found that 17 per cent of the respondents lack awareness in skill development training nor are they aware of how they will get a job after training. An awareness program on various skill development training will help them to select from the available trainings in which they are interested. Through awareness programs in the village, the youth will come to know what all skill development and vocational training programs are available in the area. Later NTPC can link the trained youth to the industries and commercial services organisation for placement.

<sup>&</sup>lt;sup>17</sup> Household Survey – IICA 2020

<sup>&</sup>lt;sup>18</sup> Household Survey – IICA 2020

<sup>&</sup>lt;sup>19</sup> Multi-Discipline Skill Development Training Model – NITI Aayog Best Practices

The silk industry is also one of the industries that's currently booming in Raigarh along with other industries producing iron ore, steel and power in the country. There are two types of silk produced in the Raigarh district; they are Tasar Silk & Malburry Silk. The production of Silk is the main livelihood for some of the villagers in this district and many of them have now started running units for producing Silk sarees and dress materials for export. NTPC should ensure training people in these sectors for getting them sustainable employment. Other sectors to focus on are industries and construction, retail trade and information technologies might be beneficial for the respondents.

The government programs like Pradhan Mantri Kaushal Vikas Yojna of the central government has opened many centres for training in rural areas. Under Pradhan Mantri Kaushal Vikas Yojana, a list of job roles is to be implemented through the Pradhan Mantri Kaushal Vikas Kendras all over India. NTPC can enrol the interested unemployed people of the villages in the areas. NTPC can provide funds to the people for paying the fees for the trainees. This will impart training to provide employment opportunities to youth at the district and state level.

Respondents who are aware have asked for vocational training in the IT sector. NTPC Lara can identify skill training centers in Raipur and can help the people in documentation and getting them enrolled in these (more than 20) centers. The fees can be funded by NTPC Lara. Moreover, remote training through tabs can also be set up by NTPC for people living in the area.

#### **Agricultural Development**

The people in the villages are involved in many sorts of employment for their subsistence. Figure 20 shows people that are engaged in the agricultural and non-agricultural sector. Farming and agricultural labourer (80%), is seen as the prevalent mode of occupation. In the non-agricultural sector, people engaged as skilled labourers in the service sector (4%), business or other (10%) such modes of occupation are lesser in comparison to the rest of the occupation. Farming is seen as the major source of livelihood for the people of these villages.

Figure 21: People working in Agricultural and non-agricultural sector

The figure 21 shows people that are engaged in Agricultural and non-agricultural sector

**Findings and Observations:** People are engaged in subsistence farming with traditional means of farming. The major crop grown in the area is Rice. It was found that 61 per cent of respondent households own land. Among them, the entirety of them uses the land for farming. Only 1.04% use the land for poultry.

From the field survey, it was found that 97 per cent of land owners used their land for farming. The farmers are dependent on rainwater. 84 per cent of them said that the major issue that they are facing is lack of water for irrigation for farming

In the domain of agriculture, there are many interventions done by government and private entities. To tackle diverse challenges like lack of water for farming, capacity building of farmers, accessibility to seeds, fertilizers and awareness regarding organic farming projects have been designed and implemented in all parts of the country. Some of them are as follows:

#### **Recommendation:**

NTPC can design and implement a drip irrigation intervention in the area. A drip irrigation system for 5 acres of land will approximately cost 5.4 lacs. Firstly, NTPC can begin by

identifying the farmers who would be interested in the initiative. Second, NTPC can connect these farmers with Pradhan Mantri Krishi Sinchai Yojana by providing support in filling up forms and helping them with documentation and making farmers aware of the schemes. The scheme (on micro Irrigation) aims to provide subsidy to farmers by promoting appropriate technological interventions like drip irrigation technology.

Third, in the implementation phase, NTPC can fund the rest of the cost and install the drip irrigation system in the farms. By implementing drip irrigation, will ensure economic use of water, and will improve soil water retention capacity and groundwater levels for small and large scale farmers. Seasonal farmers depending on the monsoon have been able to grow crops in both seasons with 60 per cent less water consumption coupled with increased income. Lastly, for a long term impact and sustainability, NTPC needs to do capacity building of farmers on operations and maintenance of the system.

Objective 4 To identify gender wise critical educational, health, and recreation needs with specific social indicators like literacy, education, training and skills, and opportunities for all members of the society cutting across gender, age, caste and religion to evaluate the need in the future

Gender needs are the needs of the women of the community. For women to excel in any society. It is needed that community development activities and CSR Interventions are designed in such a manner that it fosters gender equality. In the study villages, almost 1/3 of the women are found illiterates.

Figure 22: Education Level of Women

The figure 22 shows the education level of the women of the villages

**Findings and Observations:** In the area of Education, Illiterate women (36%) are more than men (15%). It was also found that 13 per cent of the children age 6-14 were dropped out of schools. For girls, the reasons were either the school is far away, lack of awareness regarding

menstrual hygiene or they were required for household work. 7 per cent of the respondents also said that Education is not important for girls.

In the field survey, it was found that 41 per cent of the woman respondents were found to be illiterate. Among the literate females (59%) a major portion of 43 per cent of the women has no academic qualification. They are literates with no formal education. A total of only 6 per cent of women have higher education qualifications, where 6 per cent are undergraduates and 5 per cent are Sr. Secondary pass outs.

There were multiple reasons for the persistence of widespread illiteracy among women. The social structure as well as traditional practices have been fostering this situation. The vicious cycle of women being reduced to household chores has kept them away from attaining formal education. Being a homemaker has cut them off from the outside world. Hence, there is a major lack of awareness in women of the villages towards reading and writing. It was also found that women are homemakers (35%). Eighty per cent of the female respondents have asked for education and employment through skill development training and vocational training. Mostly, women respondents have suggested training like stitching and sewing. They also had lack of awareness amongst them as they were not able to choose and decide upon what skill development training they wanted to attend.

#### Health

There are numerous pathways by which greater gender equality can lead to improvements in health and quality of life for women and their family members. Women with a greater agency are more likely to access health services and have control over health resources, and less likely to suffer domestic violence. Their children are more likely to survive, receive better childcare at home and receive health care when they need it. At the same time, improved health outcomes for women can help to strengthen their agency and empowerment.

In case of awareness level, pregnant women and mothers do lack awareness regarding the healthy diet and food intake they need for themselves and their infants. They do not take their health seriously. Women of the villages were not aware of the basic health benefits and women and child-centric government schemes in the area of maternal and child healthcare.

Women have asked for frequent health camps, pharmacy shops in the villages making medicines accessible for the village community. Awareness camps should be set up for women and adolescent girls in the villages. Need for accessible health facilities and effective staff for rural women.

The ambulance services in the nearby villages were not very efficient in the villages. Many women have stressed and showed their displeasure at the delayed response of arrival of the ambulance whenever needed<sup>20</sup>. Ambulance efficiency was one of the major concerns for the women. It was also found that the sub-centres are not equipped, people have to travel to PHC at Chhapora village. There are no private or government clinics in the villages. Women of the community have to travel long distances for small health issues which impacts their livelihood.

For catering to the needs of the women Anganwadi centres were found to have very poor infrastructure. From the field survey, it was found that Anganwadi of 4 villages had poor infrastructure. In case of awareness level, pregnant women and mothers do lack awareness regarding the healthy diet and food intake they need for themselves and their infants. They do not take their health seriously. Women of the villages were not aware of the basic health benefits and women and child-centric government schemes in the area of maternal and child healthcare<sup>21</sup>.

Women have asked for frequent health camps, pharmacy shops in the villages making medicines accessible for the village community. Awareness camps should be set up for women and adolescent girls in the villages. Need for accessible health facilities and effective staff for rural women.

<sup>&</sup>lt;sup>20</sup> Women FGD

<sup>&</sup>lt;sup>21</sup> Aanganwadi KII

# **Objective 5** To identify areas of interventions where community development activities can bring gender equality

There are several needs that have emerged from the previous objective 2.3. In order to work towards gender equality NTPC needs to focus on interventions through a gender lens

#### Intervention in the Field of Education and Skill Development

Women are homemakers, occupied with their household work. With such traditional household responsibility and daily routine, formal education is not easy to achieve. To tackle the education needs of the women of the communities, NTPC needs to have focused intervention that can work along with the daily routine of the women of the villages.

NTPC can fund remote classes in collaboration with E-Voice Committee and Gram Panchayat. EVOICE committee i.e. Employees' Voluntary Organisations for Initiatives on Community Empowerment. The committee comprises the family members of the employees that are living in the township of the NTPC. These people are a big talent pool of resources that can be used for alleviating the condition of people living in the vicinity of the NTPC station.

After identifying the women eager to learn to read and write. Classes can be conducted remotely through tabs and smartphones. NTPC can work in collaboration with the Gram Panchayat to set up online classes for the women. Tabs and stationary can be provided to the women by NTPC for taking academic sessions. The teachers can take classes and schedule exams through tabs. Through tabs, women can take classes and give exams in their own free time. The tabs will also help to monitor and evaluate their progress report through tests and assignments designed along with the curriculum. A village committee can be formed for managing the batches of the women and taking care of the tabs. The tabs will be collected and maintained by the committee members. The committee members will also help in enrolling more women in the program. Through this approach, we can bring the program to their doorstep and can plan it around their domestic work schedule that they are engaged in throughout the day.

The tabs can also be used for providing a session on imparting knowledge on SHG groups. Various modules can be designed on Self Help Groups formations, how to open a bank account, maintaining registers and micro-financing. A mechanism for asking questions in the

tabs should also be installed. Women will be able to form new SHGs and able to take a positive step towards earning independently. For transportations, NTPC can provide bicycles for girl students. Through bicycles the girls will be able to go to school frequently and not miss their education.

NTPC should ensure equal participation of women in the skill development interventions at the village level. The recommended project in objective 3 should focus on both unemployed men and women of the village. Moreover, specific training and programs may be chalked out for women in both agricultural and non-agricultural sectors that are available in the state.

#### **Intervention in the Field of Health**

NTPC Lara has provided Mobile Medical Units to cater the health needs of the village communities. For improving the maternal and child healthcare, NTPC can incorporate services that will cater the needs of children and women health care in the current mobile medical unit. To cater to the needs of women and children a focused intervention should be on Maternal and Child Healthcare. It should aim at improving the health of pregnant women and infants and all the activities that are conducted pre and post-pregnancy with both the actors. In accordance with the NTPC policy on maternal and child healthcare, these services should be extended with the MMU. The maternal and child healthcare team should operate with the Mobile Medical Unit. Records of pregnant women and infants No. of antenatal care, postnatal care, immunizations should be done at Gram Panchayat level. Awareness programs on maternal and child health care, reproductive health and menstrual hygiene will improve and promote health literacy.

Secondly, it was found that in 4 out of 10 villages, Anganwadi Centers have very poor infrastructure. The Anganwadi Workers run the centers in their homes. NTPC can repair the Anganwadi Centers and can provide the basic amenities in the center like toys for children, furniture and electric appliances etc.

# **Objective 6** To identify infrastructural needs of the target area and prioritize them based on Social Development Indicators

Infrastructural Needs are the prime needs of the communities. There are various needs that have come out in this need assessment survey.

#### **Intervention in the Piped Drinking Water**

From the field survey, it was found that the piped drinking facilities in the villages are below the district benchmark. The people fetch water from other sources like hand pumps, bore wells, and wells.

It was found from the household survey, 24 per cent of the village respondents have agreed that there is a poor quality of water drinking. 21 per cent of the respondents have shown a lack of access to drinking water. Eight per cent of the respondents said that they invest a lot of time in collecting the water. Three per cent of the respondents said that there is a lack of proper storage of water in the village. Eighty per cent of the respondents from the villages have asked for pipe drinking water interventions. Getting clean potable water is a big priority for these village communities.

#### Recommendation

As per the need NTPC can fund for the system of piped drinking water in the village. The project should be designed to keep the components of the NTPC CSR policy on potable drinking water in check. To make a measurable impact, the monitoring and evaluation of the project should be done annually. NTPC can also dovetail the 'Har Ghar Jal Scheme' of the Government of India by providing drinking water supply through pipelines to each household through elevated storage reservoirs in every village.

#### Intervention in the field of Rural Infrastructure: Education and Health

In the field of education, the respondents have listed various issues. 35 per cent of the respondents have said that the quality of education is not up to the mark. New ways should be used for improving the learning levels. The lack of smart classes in the school. There is no

transport available for the students and finally, the teachers need capacity building training to adapt to new ways of teaching<sup>22</sup>.

It was also found from the Anganwadi Center focused group discussions that Anganwadi centers have very poor infrastructure. Respondents from villages like Bodajharia, Dewalsurra, Jhilgitar, and Mahloi stated that the infrastructure of the Anganwadi Centers are poor. The respondents of the villages have suggested a better quality of education and school facilitates. Along with school the pre-primary school/Anganwadi centre available for the village community should also have better infrastructure.

#### Recommendation

NTPC needs design-focused intervention in providing quality education. A project on improving learning levels at primary schools designed to have quality education in government schools. To achieve that, NTPC can provide technological support for teaching through audio-visual aids. One-time installation of equipment such as Smart TV, projectors or computers.

The electronic equipment can be connected to solar power depending on the power cut at schools. Initially by targeting only the primary schools in the neighbouring villages. Teaching through films and audiovisuals have shown greater impacts on the learning abilities of students. Adding such techniques to the curriculum will have a change in the perception of students, teachers and parents, motivate them to study and engage themselves in new learning techniques.

In the field of health, another project on repairing and reconstruction of Anganwadi Centers of the villages can be up by NTPC. NTPC can target and fund 1 Anganwadi centre from each project affected villages. The project will aim at improving the health of pregnant women, adolescent girls and infants and the learning levels of the children of the village.

Moreover, Smart TV can be installed in the Anganwadi centre where children can learn through new audiovisual lessons<sup>23</sup>. Lectures and sessions on awareness programs on menstrual hygiene and sexual and reproductive health can be watched. The new environment of the

<sup>&</sup>lt;sup>22</sup> School KII

 $<sup>^{23}\</sup> https://www.vedantaresources.com/Pages/NandGhar.aspx$ 

Anganwadi will impact the infant mortality and maternal mortality of the villages. The enrollment of pregnant women, adolescent girls, infants and children will also increase.

Objective 7 To explore opportunities of networking / partnerships with Govt. / Local bodies' plans and intervention for spearheading overall development of the target area. Specifically, it will include the following.

- To take stock of the development plans prepared by any government agency for the area.
- To review the plan and the budget available under various central / state government schemes for development of the area.
- To identify the gaps between the plans of the government / local bodies / NTPC and the specified indicators/goals

There are various government programs running for the welfare of the society in the domains of education, health, skill development, rural infrastructure, water and sanitation. From the household survey it was found that there are many schemes from which the respondents have benefitted.

#### **Programs in the area of Education**

In the field of education, both the central and state government has been working on giving a better quality of education to children. Currently, the government of Chhatisgarh is working on basic education through the Samgra Siksha and Mid-Day Meal Program. The program seeks to improve the quality of education in 1.6 lakh schools and has started with a special focus on basic teaching skills. With this, children develop the ability to read with understanding and calculate basic mathematics and solve questions, which become the basis for learning other arts and subjects in their future.

Another flagship scheme is the Rashtriya Madhyamik Shiksha Abhiyan (RMSA) of the Government of India, which aims to enhance access to secondary education and improve its quality. The objective of the scheme is to envisage achieving a gross enrolment ratio of 75% from 52.26% in 2005-06 for classes IX-X within 5 years of its implementation, by providing a secondary school within a reasonable distance of any habitation.

The schemes focus on various quality interventions on which NTPC can also collaborate with the government are as follows:

- a. Additional classrooms
- b. Drinking water provisions
- c. Focus on Science, Math and English Education
- d. In-service training of teachers
- e. ICT enabled education

From the data collection, it was found that 23% of teachers of the schools situated in the study villages did not get any effective learning in the classroom. Teachers of 5 out of 10 schools rated poor for clean sources of drinking water at school. For Science lab and necessary science equipment, 9 out of 10 teachers in the teacher's key informant interview rated poor.

NTPC can fulfil the gap by providing training to the teachers of the government schools. Coordinating with district and block officials, NTPC can facilitate training for the teachers and test for the students for overall performance in various subjects.

The policy of NTPC on Improving learning levels outcomes and quality of education for children studying in Government schools covers various aspects/activities of these projects that have been run by the government. NTPC after coordinating with district and block officials can chalk out plans for each school that are present in the study villages.

#### Programs in the area of Skill Development

In the Pussore block only 1180<sup>24</sup> trainees have been trained under skill development training. The gap as shown on the dashboard for Gram Panchayats for Pussore blocks is 58% moderate and 40% critical for Vocational Training Centre/Polytechnic/ITI/RSETI/DDU-GKY. The details on gaps logic can be found in the annexures. From the household data, it was found that only 23% of respondents have benefited from Pradhan Mantri Kaushal Vikas Yojana and only 1% of the respondents have benefitted from DDU-GKY,

<sup>&</sup>lt;sup>24</sup> Antyodaya Dashboard

As recommended earlier in objective 2 of the report, NTPC must become a facilitator to provide skill development training in the neighbouring villages. NTPC needs to firstly, aware of the people regarding various skill development training. The people of these villages are hardly aware of the different types of training. Secondly, making the training accessible for the village people. NTPC can either provide logistics support at their stations or can coordinate with the village officials to conduct these training in the area/centres/infrastructure available inside the villages.

#### **Programs in the area of Rural Infrastructure**

In the area of Rural Infrastructure, Pradhan Mantri Awas Yojana is a housing scheme that was introduced by the central government in the year of 2015. It is a social welfare programme endorsed by the Government of India under which it intends to provide beneficiaries with housing units.

In the Pussore, Villages with <20% of kutcha houses are 25%. The number of Pradhan Mantri Awas Yojna beneficiaries are 9350. The gap as shown on the dashboard for Gram Panchayats for Pussore blocks is 67% moderate. The 67% gap means that no. of households with a kutcha wall and kutcha roof is between 20-60% in GP in 25% of the Gram Panchayat.

NTPC can bridge this gap by making more PMAY beneficiaries in the village. A list of eligible candidates must be identified from the villages through awareness programs in the sessions. Awareness and documentation camps can be set up in villages where NTPC can help the people in filling forms, gathering documents to avail the scheme. This can be done through collaboration with the village, block and district officials. A record must be maintained of the new beneficiaries of this scheme.

In the domain of drinking water, the Jal Shakti ministry aims to provide piped drinking water to all the rural households by 2024 under the Jal Jeevan Mission. In 2018-19, 9.09% of households were provided with access to piped water. It was way behind the 2017 target of providing pipe drinking water. Only 9.09% of the households have piped drinking water in Raigarh District<sup>25</sup>. To provide pipe drinking water by 2024 there is a long way to go.

<sup>&</sup>lt;sup>25</sup> Jal Jeevan Mission Dashboard

NTPC through its Jal Jyoti mission on providing potable drinking water can support the mission in fulfilling its goal. The objective is to ensure accessibility of potable drinking water in adequate quantities on a regular and sustainable basis leading to improvement in living standards of communities in the vicinity of NTPC's Stations.

#### **Programs in the area of Agriculture**

Farming and agricultural labour is a major livelihood generation activity for many in the Pussore Block. There are various programs in the agricultural domain for farmers. Programs like Pradhan Mantri Kisan Pension Yojana and Pradhan Mantri Fasal Bima Yojana. In the data for Farmers aged 18-40, 72.7% of Gram Panchayat fall in the critical category gap type for Pradhan Mantri Kisan Pension Yojana. 53.4% of the Gram Panchayat falls in the critical category for farmers who have received a benefit under Pradhan Mantri Fasal Bima Yojana. Along with these schemes, it is also found that Watershed Development projects are also very few in the Pussore Block. 46.6% of the Gram Panchayat falls in the critical category for watershed development projects.

Farmers awareness projects must be implemented by NTPC in the study villages. NTPC can set up camps in collaboration with government authorities at the village, block and district level. Farmers can get themselves registered in these schemes through these camps. The camp will also provide awareness regarding organic farming, how to form Farmers producers organisations FPOs and primary agriculture cooperatives PACs. This practice will minimise the gaps and make farmers more aware of such benefits from the government.

#### **Programs in the area of Health**

In the domain of health, various schemes have been listed for the benefit of the people. For maternal and child health care, the government flagship program of Integrated Child Development Services. There are also various schemes listed for pregnant women and children such as Janani Shishu Suraksha Karyakaram (JSSK), Janani Suraksha Yojana (JSY), Pradhan Mantri Surakshit Matritva Abhiyan and Pradhan Mantri Matru Vandana Yojana (PMMVY). The goal of these program/schemes is to reduce maternal and neonatal mortalities by promoting institutional deliveries. However, the benefits are not reaching the rural community for various reasons. The following is the status of Pussore Block:

Table 6: Health Status of Pussore Block

S. No.	Parameter Name	Status (Falling in Critical Category)
1.	Total no of children aged 0-3 years registered in Anganwadi - 48% Critical	1.1%
2.	No of children aged 0-3 years immunized	3.4%
4.	No. of Anemic Pregnant Women	39.8%
5.	No. of children under the age of 6 years who are Underweight	37.5%
6.	Total number of children (0-6 years) immunized under ICDS	26.1%
7.	No of pregnant women receiving services under ICDS	15.9%
8.	No of lactating mothers receiving services under ICDS	36.4%
12.	No of beneficiaries receiving benefits under Pradhan Mantri Matru Vandana Yojana	15.9%
13.	Sub Centre PHC/CHC	64.8%
14	Availability of Mother and Child Health facilities	80%

Many parameters have fallen in the critical category with a high level of percentage. NTPC through projects like mobile medical units can reduce the gaps. Through the mobile medical unit, people will have health facilities at their doorsteps. As elaborated earlier in the report, for rural areas that do not have availability and accessibility to government health facilities, where people are not aware of the schemes and programs, MMU can be a one-stop solution for all.

Moreover, as in the policy of learning levels, NTPC must work towards improving the overall physical environment of the Anganwadi Centers of the villages also for better health outcomes.

#### **Overall Findings and Recommendation**

#### **Skill Development Training**

India's rural unemployment rate is 5.84% in the current year. Chhattisgarh unemployment rate is 8.4%. In comparison to the national and state unemployment rate, the percentage of people unemployed are higher. 4 out of 9 villages have a higher percentage of people who are unemployed when compared with state unemployment rates.

**Recommendation:** People have asked for computer training. NTPC Lara can identify skill training centers in the Raipur district and can help the people in the documentation and getting them enrolled in these (more than 20 are present in Raigarh district) centers. The fees can be funded by NTPC Lara. Moreover, remote training through tabs can also be set up by NTPC for people living in the area.

## Agriculture

From the field survey, the data showed that 80% of the respondents' occupations are in the area of agriculture. The people are either farming on their land or working as an agricultural labourer in the villages. The major crop grown in the area is rice. The farmers are dependent on rainwater. 84 per cent of them said that the major issue that they are facing is lack of water for irrigation for farming.

**Recommendation:** NTPC can design and implement a drip irrigation intervention in the area. By implementing drip irrigation, will ensure economic use of water, and will improve soil water retention capacity and groundwater levels for small- and large-scale farmers.

## Gender wise critical education and health needs

In the area of Education, Illiterate women (36%) are more than men (15%). It was also found that 13% of the children age 6-14 were dropped out of schools. For girls, the reasons were either the school is far away, lack of awareness regarding menstrual hygiene or they were required for household work. 7% of the respondents also said that Education is not important for girls.

62

**Recommendation:** NTPC can fund remote classes for the women that are living in the villages. Through tabs and smartphones, we can bring the program to their doorstep and can plan it around their domestic work schedule that they are engaged in throughout the day.

Awareness programs in the area of girl child education and menstrual hygiene needs to be conducted in the villages. NTPC along with health front line workers can conduct these programs. For transportations, NTPC can provide bicycles for girl students. It was found that many girls travel on bicycles to attend their classes.

In the area of health, pregnant women and mothers do lack awareness regarding the healthy diet and food intake they need for themselves and their infants. They do not take their health seriously. Women of the villages were not aware of the basic health benefits and women and child-centric government schemes in the area of maternal and child healthcare.

Women have asked for frequent health camps, pharmacy shops in the villages making medicines accessible for the village community. Awareness camps should be set up for women and adolescent girls in the villages. Need for accessible health facilities and effective staff for rural women.

**Recommendation:** NTPC Lara has provided Mobile Medical Units to cater the health needs of the village communities. For improving the maternal and child healthcare, NTPC can incorporate services that will cater the needs of children and women health care in the current mobile medical unit. Secondly, it was found that in 4 out of 10 villages Anganwadi Centers have very poor infrastructure. NTPC can repair the Anganwadi Centers and can provide the basic amenities in the center like toys for children, furniture and electric appliances etc.

## In the area of Rural Infrastructure

For the field survey, it was found that villages like Chhapora (17%) Mahloi (12%) has a pipe drinking water supply. The rest of the villages have 0-4 per cent of piped water facility. Piped drinking water supply is desired by the people living in the villages.

**Recommendation:** To increase the piped water coverage in the area, NTPC Lara should expedite the implementation of piped water projects as per its CSR policy. To make a measurable impact, the monitoring and evaluation of the project should be done annually. NTPC

can also dovetail the 'Har Ghar Jal Scheme' of the Government of India by providing drinking water supply through pipelines to each household through elevated storage reservoirs in every village.

In the field of education, the respondents have listed various issues. 30% of the respondents have said that the quality of education is not up to the mark. New ways should be used for improving the learning levels. It was also found from the Anganwadi Center focused group discussions that Anganwadi centers have very poor infrastructure. Respondents from villages like Bodajharia, Dewalsurra, Jhilgitar, and Mahloi stated that the infrastructure of the Anganwadi Centers are very poor.

## A Way forward

To implement the recommended projects, an action plan is chalked out for all the domains where needs are identified. Firstly, the impact of the projects implemented by the NTPC Lara is analyzed in objective 2. After the analysis, the current gaps and the needs of the people have been explored and written down in objective 3, 4, and 5. For each need a project is designed, catering specific needs of the village people.

The projects have been detailed out in different objectives mentioned earlier in the report. The action plan also consists of a suggestive budget phasing and source of funding. Through the action plan, NTPC Lara will be able to initiate the projects in the neighbouring project villages. The action plan has been attached in Annexure 5.

Annexure 6: Village wise data in some broad Areas

<sup>&</sup>lt;sup>26</sup> The average reported monthly income across the villages is in the range of Rs 2672-11976 Rs, with an average of Rs 7389 for all study villages. This information contradicts the high percentage of BPL card holders (households with an annual family income of less than 24000 Rs) in the study villages. This discrepancy in percentage of BPL card holders can be explained through yet to be updated ration card categories in the next Socio-economic Caste Census.

pH Value		7.3	
Electrical Conductivity	microS/cm	510	
TDS	mg/lit	340	
TSS	mg/lit	BQL(LOQ:5.0)	
Ca-Hardness as CaCO3	mg/lit	130	
Mg-Hardness as CaCO3	mg/lit	62	
BOD	mg/lit	1.4	
COD	mg/lit	3.4	
Oil & Grease	mg/lit	BQL ( LOQ:2.5)	
Fluoride (as F)	mg/lit	0.56	
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)	
Total Coliform	MPN/100ml	3.4	
E-coli	MPN/100ml	Absent	

## 1.1 (b) Ground water Quality near Ash Dyke village: Kandagarh

Parameters	Unit	Ground Water 30.10.2023
Temperature	degree C	26.3 deg. C
pH Value		7.4
Electrical Conductivity	microS/cm	465
TDS	mg/lit	310
TSS	mg/lit	BQL(LOQ:5.0)
Ca-Hardness as CaCO3	mg/lit	117
Mg-Hardness as CaCO3	mg/lit	54
BOD	mg/lit	1.2
COD	mg/lit	3.1
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.40
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	4.8
E-coli	MPN/100ml	Absent

## 1.1 (c) Ground water Quality Plant nearby village:- Bodajhariya

Parameters	Unit	Ground Water 30.10.2023
Temperature	degree C	26.1 deg. C
pH Value		7.6
Electrical Conductivity	microS/cm	490
TDS	mg/lit	326
TSS	mg/lit	BQL(LOQ:5.0)
Ca-Hardness as CaCO3	mg/lit	109
Mg-Hardness as CaCO3	mg/lit	60
BOD	mg/lit	1.1
COD	mg/lit	3.0
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.44
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	5.3
E-coli	MPN/100ml	Absent

## 1.1 (d) Ground water Quality near Ash Dyke village: Jhilgitar

Parameters	Unit	Ground Water 30.10.2023	
Temperature	degree C	26.1 deg. C	
pH Value		7.5	
Electrical Conductivity	microS/cm	503	
TDS	mg/lit	335	
TSS	mg/lit	BQL(LOQ:5.0)	
Ca-Hardness as CaCO3	mg/lit	104	
Mg-Hardness as CaCO3	mg/lit	56	
BOD	mg/lit	1.0	
COD	mg/lit	2.9	
Oil & Grease	mg/lit	BQL ( LOQ:2.5)	
Fluoride (as F)	mg/lit	0.50	
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)	
Total Coliform	MPN/100ml	3.0	
E-coli	MPN/100ml	Absent	

## 1.1 (e) Ground water Quality Plant nearby village: Mehloi

Parameters	Unit	Ground Water 30.10.2023
Temperature	degree C	26.5 deg. C
pH Value		7.3
Electrical Conductivity	microS/cm	535
TDS	mg/lit	356
TSS	mg/lit	BQL(LOQ:5.0)
Ca-Hardness as CaCO3	mg/lit	106
Mg-Hardness as CaCO3	mg/lit	57
BOD	mg/lit	1.3
COD	mg/lit	3.7
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.54
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	3.2
E-coli	MPN/100ml	Absent

### 1.1 (f) Ground water Quality near Plant nearby village: Chhapora

Parameters	Unit	Ground Water 30.10.2023		
Temperature	degree C	26.8 deg. C		
pH Value		7.4		
Electrical Conductivity	microS/cm	529		
TDS	mg/lit	352		
TSS	mg/lit	BQL(LOQ:5.0)		
Ca-Hardness as CaCO3	mg/lit	126		
Mg-Hardness as CaCO3	mg/lit	68		
BOD	mg/lit	1.2		
COD	mg/lit	3.2		
Oil & Grease	mg/lit	BQL ( LOQ:2.5)		
Fluoride (as F)	mg/lit	0.53		
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)		
Total Coliform	MPN/100ml	3.0		
E-coli	MPN/100ml	Absent		

## 1.1 (g) Surface water : Chhapora Nala Down stream

Parameters	Unit	Surface Water 30.10.2023
Temperature	degree C	26.0 deg. C
pH Value		7.2
Electrical Conductivity	microS/cm	510
TDS	mg/lit	340
TSS	mg/lit	26
Ca-Hardness as CaCO3	mg/lit	140
Mg-Hardness as CaCO3	mg/lit	75
BOD	mg/lit	7.8
COD	mg/lit	22.1
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.48
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	62
E-coli	MPN/100ml	Absent

## 1.1 (h) Surface water : Chhapora Nala Up stream

Parameters	Unit	Surface Water 30.10.2023	
Temperature	degree C	26.1 deg. C	
pH Value		7.3	
Electrical Conductivity	microS/cm	524	
TDS	mg/lit	349	
TSS	mg/lit	31	
Ca-Hardness as CaCO3	mg/lit	129	
Mg-Hardness as CaCO3	mg/lit	80	
BOD	mg/lit	7.4	
COD	mg/lit	21.8	
Oil & Grease	mg/lit	BQL ( LOQ:2.5)	
Fluoride (as F)	mg/lit	0.45	
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)	
Total Coliform	MPN/100ml	58	
E-coli	MPN/100ml	Absent	

## 1.1 (i) Surface water : Kelo river

Parameters	Unit	Surface Water 30.10.2023
Temperature	degree C	26.2 deg. C
pH Value		7.8
Electrical Conductivity	microS/cm	542
TDS	mg/lit	361
TSS	mg/lit	36
Ca-Hardness as CaCO3	mg/lit	133
Mg-Hardness as CaCO3	mg/lit	72
BOD	mg/lit	6.9
COD	mg/lit	20.4
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.53
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	46
E-coli	MPN/100ml	Absent

# 1.1 (f) Ground water Quality Plant nearby village: Dewalsura

Parameters	Unit	Ground Water 22.11.2023
Temperature	degree C	26.2 deg. C
pH Value		7.4
Electrical Conductivity	microS/cm	502
TDS	mg/lit	334
TSS	mg/lit	BQL(LOQ:5.0)
Ca-Hardness as CaCO3	mg/lit	118
Mg-Hardness as CaCO3	mg/lit	58
BOD	mg/lit	1.2
COD	mg/lit	3.1
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.49
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	4.1
E-coli	MPN/100ml	Absent

Parameters	Unit	Ground Water 22.11.2023
Temperature	degree C	26.2
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.148
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

## 1.1 (g) Ground water Quality Plant nearby village: Charpali

Parameters	Unit	Ground Water 22.11.2023
Temperature	degree C	26.5 deg. C
pH Value		7.6
Electrical Conductivity	microS/cm	531

TDS	mg/lit	347
TSS	mg/lit	BQL(LOQ:5.0)
Ca-Hardness as CaCO3	mg/lit	89
Mg-Hardness as CaCO3	mg/lit	46
BOD	mg/lit	1.0
COD	mg/lit	2.9
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.65
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	3.8
E-coli	MPN/100ml	Absent

Parameters	Unit	Ground Water 22.11.2023
Temperature	degree C	26.5
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.197
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

## 1.1 (h) Surface water:- Chhapora Nala Down stream

Parameters	Unit	Surface Water 22.11.2023
Temperature	degree C	26.2 deg. C
pH Value		7.5
Electrical Conductivity	microS/cm	494
TDS	mg/lit	321
TSS	mg/lit	40
Ca-Hardness as CaCO3	mg/lit	128
Mg-Hardness as CaCO3	mg/lit	67
BOD	mg/lit	6.3
COD	mg/lit	21.2
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.41
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	89
E-coli	MPN/100ml	Absent

Temperature	degree C	26.2
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.189
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

## 1.1 (i) Surface water : Chhapora Nala Up stream

Parameters	Unit	Surface Water 22.11.2023
Temperature	degree C	26.2 deg. C
pH Value		7.6
Electrical Conductivity	microS/cm	506
TDS	mg/lit	337
TSS	mg/lit	31
Ca-Hardness as CaCO3	mg/lit	115
Mg-Hardness as CaCO3	mg/lit	70
BOD	mg/lit	6.1
COD	mg/lit	22.2
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.49
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	70
E-coli	MPN/100ml	Absent

Temperature	degree C	26.2
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.195
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

# 1.1 (j) Surface water : Kelo river Downstream water

Parameters	Unit	Surface Water 22.11.2023
Temperature	degree C	26.4 deg. C
pH Value		7.6
Electrical Conductivity	microS/cm	515
TDS	mg/lit	343
TSS	mg/lit	34
Ca-Hardness as CaCO3	mg/lit	125
Mg-Hardness as CaCO3	mg/lit	78
BOD	mg/lit	2.7
COD	mg/lit	4.9
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.47
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	55
E-coli	MPN/100ml	Absent

Temperature	degree C	26.4
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.210
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

## 1.1 (k) Surface water : Mahanadi river Downstream water

Parameters	Unit	Surface Water 22.11.2023
Temperature	degree C	26.2 deg. C
pH Value		7.7
Electrical Conductivity	microS/cm	348
TDS	mg/lit	232
TSS	mg/lit	24
Ca-Hardness as CaCO3	mg/lit	96

Mg-Hardness as CaCO3	mg/lit	33
BOD	mg/lit	2.1
COD	mg/lit	4.2
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.62
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	55
E-coli	MPN/100ml	Absent

Temperature	degree C	26.2
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.18
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

# 1.1 (I) Ground water : Solid waste storage area- I

Parameters	Unit	Ground Water 22.11.2023
Temperature	degree C	26.1 deg. C
pH Value		7.8
Electrical Conductivity	microS/cm	502
TDS	mg/lit	334
TSS	mg/lit	BQL (LOQ:5.0)
Ca-Hardness as CaCO3	mg/lit	128
Mg-Hardness as CaCO3	mg/lit	58
BOD	mg/lit	1.0
COD	mg/lit	2.9
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.54
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	3.2
E-coli	MPN/100ml	Absent

Temperature	degree C	26.1
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.087
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

## 1.1 (m) Ground water : Solid waste storage area- II

Parameters	Unit	Ground Water 22.11.2023
Temperature	degree C	26.2 deg. C
pH Value		7.5
Electrical Conductivity	microS/cm	515
TDS	mg/lit	343
TSS	mg/lit	BQL (LOQ:5.0)
Ca-Hardness as CaCO3	mg/lit	124
Mg-Hardness as CaCO3	mg/lit	60
BOD	mg/lit	1.3
COD	mg/lit	3.2
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.51
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	3.8
E-coli	MPN/100ml	Absent

Temperature	degree C	26.2
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.099
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

### 1.1 (n) Ground water : Solid waste storage area- III

Parameters	Unit	Ground Water 22.11.2023
Temperature	degree C	26.1 deg. C
pH Value		7.2
Electrical Conductivity	microS/cm	524
TDS	mg/lit	349
TSS	mg/lit	BQL (LOQ:5.0)
Ca-Hardness as CaCO3	mg/lit	130
Mg-Hardness as CaCO3	mg/lit	63
BOD	mg/lit	1.2
COD	mg/lit	3.0
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.48
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	3.1
E-coli	MPN/100ml	Absent

Temperature	degree C	26.1
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.079
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

## 1.1 (0) Ground water : Solid waste storage area- IV

Parameters	Unit	Ground Water 22.11.2023
Temperature	degree C	25.9 deg. C
pH Value		7.8
Electrical Conductivity	microS/cm	510
TDS	mg/lit	340
TSS	mg/lit	BQL (LOQ:5.0)

Ca-Hardness as CaCO3	mg/lit	128
Mg-Hardness as CaCO3	mg/lit	67
BOD	mg/lit	1.5
COD	mg/lit	3.3
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.54
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	3.8
E-coli	MPN/100ml	Absent

Temperature	degree C	25.9
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.112
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

# 1.1(p) Ground water Hazardous Waste Storage Area:- Sample-1

Parameters	Unit	04.10.2023
Temperature	degree C	28.0 deg. C
pH Value		7.8
Electrical Conductivity	microS/cm	490
TDS	mg/lit	294
TSS	mg/lit	BQL (LOQ:5)
Ca-Hardness as CaCO3	mg/lit	126
Mg-Hardness as CaCO3	mg/lit	70
BOD	mg/lit	1.9
COD	mg/lit	3.8
Oil & Grease	mg/lit	BQL ( LOQ:1)
Fluoride (as F)	mg/lit	0.45
Boron (as B)	mg/lit	BQL ( LOQ:0.02)
Total Coliform	MPN/100ml	3.8
E-coli	MPN/100ml	Absent

## Ground water Hazardous Waste Storage Area (Heavy Metal):- Sample-1

Parameters	Unit	04.10.2023
Mercury	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa Cr6+	mg/lit	BQL (LOQ:0.02)
Iron	mg/lit	0.112
Copper	mg/lit	BQL (LOQ :0.01)
Chromium Total	mg/lit	BQL (LOQ :0.01)
Zinc	mg/lit	0.024
Cadmium	mg/lit	BQL (LOQ :0.0027)
Lead	mg/lit	BQL (LOQ :0.008)
Arsenic	mg/lit	BQL (LOQ :0.007)

#### 1.1(q) Ground water Hazardous Waste Storage Area:- Sample-2

Parameters	Unit	04.10.2023
Temperature	degree C	28.3 deg. C
pH Value		7.6
Electrical Conductivity	microS/cm	505
TDS	mg/lit	303
TSS	mg/lit	BQL (LOQ:5)
Ca-Hardness as CaCO3	mg/lit	116
Mg-Hardness as CaCO3	mg/lit	54
BOD	mg/lit	1.6
COD	mg/lit	3.2
Oil & Grease	mg/lit	BQL ( LOQ:1)
Fluoride (as F)	mg/lit	0.49
Boron (as B)	mg/lit	BQL ( LOQ:0.02)
Total Coliform	MPN/100ml	5.6
E-coli	MPN/100ml	Absent

### Ground water Hazardous Waste Storage Area (Heavy Metal):- Sample-2

Parameters	Unit	04.10.2023
Mercury	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa Cr6+	mg/lit	BQL (LOQ:0.02)
Iron	mg/lit	0.104
Copper	mg/lit	BQL (LOQ :0.01)

Chromium Total	mg/lit	BQL (LOQ :0.01)
Zinc	mg/lit	0.022
Cadmium	mg/lit	BQL (LOQ :0.0027)
Lead	mg/lit	BQL (LOQ :0.008)
Arsenic	mg/lit	BQL (LOQ :0.007)

#### 1.1(r) Ground water Hazardous Waste Storage Area:- Sample-3

Parameters	Unit	04.10.2023
Temperature	degree C	27.8 deg. C
pH Value		7.9
Electrical Conductivity	microS/cm	544
TDS	mg/lit	326
TSS	mg/lit	BQL (LOQ:5)
Ca-Hardness as CaCO3	mg/lit	130
Mg-Hardness as CaCO3	mg/lit	68
BOD	mg/lit	1.4
COD	mg/lit	3.0
Oil & Grease	mg/lit	BQL ( LOQ:1)
Fluoride (as F)	mg/lit	0.46
Boron (as B)	mg/lit	BQL ( LOQ:0.02)
Total Coliform	MPN/100ml	2.20
E-coli	MPN/100ml	Absent

#### Ground water Hazardous Waste Storage Area (Heavy Metal):- Sample-3

Parameters	Unit	04.10.2023
Mercury	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa Cr6+	mg/lit	BQL (LOQ:0.02)
Iron	mg/lit	0.098
Copper	mg/lit	BQL (LOQ :0.01)
Chromium Total	mg/lit	BQL (LOQ :0.01)
Zinc	mg/lit	0.028
Cadmium	mg/lit	BQL (LOQ :0.0027)
Lead	mg/lit	BQL (LOQ :0.008)
Arsenic	mg/lit	BQL (LOQ :0.007)

# 1.1(s) Ground water Hazardous Waste Storage Area:- Sample-4

Parameters	Unit	04.10.2023
Temperature	degree C	27.6 deg. C
pH Value		7.5
Electrical Conductivity	microS/cm	532
TDS	mg/lit	319
TSS	mg/lit	BQL (LOQ:5)
Ca-Hardness as CaCO3	mg/lit	124
Mg-Hardness as CaCO3	mg/lit	68
BOD	mg/lit	1.7
COD	mg/lit	3.6
Oil & Grease	mg/lit	BQL ( LOQ:1)
Fluoride (as F)	mg/lit	0.41
Boron (as B)	mg/lit	BQL ( LOQ:0.02)
Total Coliform	MPN/100ml	5.1
E-coli	MPN/100ml	Absent

### Ground water Hazardous Waste Storage Area (Heavy Metal):- Sample-4

Parameters	Unit	04.10.2023
Mercury	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa Cr6+	mg/lit	BQL (LOQ:0.02)
Iron	mg/lit	0.110
Copper	mg/lit	BQL (LOQ :0.01)
Chromium Total	mg/lit	BQL (LOQ :0.01)
Zinc	mg/lit	0.034
Cadmium	mg/lit	BQL (LOQ :0.0027)
Lead	mg/lit	BQL (LOQ :0.008)
Arsenic	mg/lit	BQL (LOQ :0.007)

Total Coliform	MPN/100ml	4.2
E-coli	MPN/100ml	Absent

## 1.1 (e) Ground water Quality Plant nearby village: Mehloi

Parameters	Unit	Ground Water 20.12.2023		
Temperature	degree C	23.4 deg. C		
pH Value		7.8		
Electrical Conductivity	microS/cm	505		
TDS	mg/lit	336		
TSS	mg/lit	BQL(LOQ:5.0)		
Ca-Hardness as CaCO3	mg/lit	121		
Mg-Hardness as CaCO3	mg/lit	55		
BOD	mg/lit	1.1		
COD	mg/lit	3.2		
Oil & Grease	mg/lit	BQL ( LOQ:2.5)		
Fluoride (as F)	mg/lit	0.60		
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)		
Total Coliform	MPN/100ml	3.1		
E-coli	MPN/100ml	Absent		

# 1.1 (f) Ground water Quality near Plant nearby village: Chhapora

Parameters	Unit	Ground Water 20.12.2023
Temperature	degree C	23.3 deg. C
pH Value		7.5
Electrical Conductivity	microS/cm	515
TDS	mg/lit	343
TSS	mg/lit	BQL(LOQ:5.0)
Ca-Hardness as CaCO3	mg/lit	138
Mg-Hardness as CaCO3	mg/lit	65
BOD	mg/lit	1.0
COD	mg/lit	3.1
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.52
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	4.5
E-coli	MPN/100ml	Absent

## 1.1 (g) Surface water : Chhapora Nala Down stream

Parameters	Unit	Surface Water 20.12.2023
Temperature	degree C	22.3 deg. C
pH Value		7.6
Electrical Conductivity	microS/cm	510
TDS	mg/lit	340
TSS	mg/lit	36
Ca-Hardness as CaCO3	mg/lit	138
Mg-Hardness as CaCO3	mg/lit	60
BOD	mg/lit	6.1
COD	mg/lit	20.2
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.52
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	90
E-coli	MPN/100ml	Absent

## 1.1 (h) Surface water : Chhapora Nala Up stream

Parameters	Unit	Surface Water 20.12.2023
Temperature	degree C	22.5 deg. C
pH Value		7.2
Electrical Conductivity	microS/cm	522
TDS	mg/lit	348
TSS	mg/lit	29
Ca-Hardness as CaCO3	mg/lit	130
Mg-Hardness as CaCO3	mg/lit	58
BOD	mg/lit	5.9
COD	mg/lit	18.2
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.58
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	62
E-coli	MPN/100ml	Absent

## 1.1 (i) <u>Surface water : Kelo river Down Stream Water</u>

Parameters	Unit	Surface Water 20.12.2023		
Temperature	degree C	22.0 deg. C		
pH Value		7.8		
Electrical Conductivity	microS/cm	503		
TDS	mg/lit	335		
TSS	mg/lit	25		
Ca-Hardness as CaCO3	mg/lit	118		
Mg-Hardness as CaCO3	mg/lit	51		
BOD	mg/lit	2.7		
COD	mg/lit	4.7		
Oil & Grease	mg/lit	BQL ( LOQ:2.5)		
Fluoride (as F)	mg/lit	0.50		
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)		
Total Coliform	MPN/100ml	53		
E-coli	MPN/100ml	Absent

Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

# 1.1 (c) Ground water Quality Plant nearby village:- Chhapora

Parameters	Unit	Ground Water 03.01.2024
Temperature	degree C	21.8 deg. C
pH Value		7.7
Electrical Conductivity	microS/cm	490
TDS	mg/lit	326
TSS	mg/lit	BQL(LOQ:5.0)
Ca-Hardness as CaCO3	mg/lit	132
Mg-Hardness as CaCO3	mg/lit	62
BOD	mg/lit	0.9
COD	mg/lit	2.8
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.43
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	4.1
E-coli	MPN/100ml	Absent

Parameters	Unit	Ground Water 03.01.2024
Temperature	degree C	21.8
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.179
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

1.1 (d) Ground water Quality near Ash Dyke village: Jhilgitar

Parameters	Unit	Ground Water 03.01.2024
Temperature	degree C	22.0 deg. C
pH Value		7.5
Electrical Conductivity	microS/cm	503
TDS	mg/lit	335
TSS	mg/lit	BQL(LOQ:5.0)
Ca-Hardness as CaCO3	mg/lit	121
Mg-Hardness as CaCO3	mg/lit	61
BOD	mg/lit	1.0
COD	mg/lit	3.1
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.39
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	5.1
E-coli	MPN/100ml	Absent

Parameters	Unit	Ground Water 03.01.2024
Temperature	degree C	22.0
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.138
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

## 1.1 (e) Ground water Quality Plant nearby village: Bodajhariya

Parameters	Unit	Ground Water 03.01.2024
Temperature	degree C	22.2 deg. C
pH Value		7.8
Electrical Conductivity	microS/cm	510
TDS	mg/lit	340
TSS	mg/lit	BQL(LOQ:5.0)
Ca-Hardness as CaCO3	mg/lit	114
Mg-Hardness as CaCO3	mg/lit	60
BOD	mg/lit	0.9
COD	mg/lit	2.5
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.36
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	5.5
E-coli	MPN/100ml	Absent

Parameters	Unit	Ground Water 03.01.2024
Temperature	degree C	22.2
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.148
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

## 1.1 (f) Ground water Quality Plant nearby village: Dewalsura

Parameters	Unit	Ground Water 03.01.2024
Temperature	degree C	22.1 deg. C
pH Value		7.5
Electrical Conductivity	microS/cm	496
TDS	mg/lit	330

TSS	mg/lit	BQL(LOQ:5.0)
Ca-Hardness as CaCO3	mg/lit	132
Mg-Hardness as CaCO3	mg/lit	65
BOD	mg/lit	1.1
COD	mg/lit	3.0
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.41
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	4.7
E-coli	MPN/100ml	Absent

Parameters	Unit	Ground Water 03.01.2024
Temperature	degree C	22.1
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.134
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

1.1 (g) Ground water Quality Plant nearby village: Charpali

Parameters	Unit	Ground Water 03.01.2024
Temperature	degree C	22.2 deg. C
pH Value		7.7
Electrical Conductivity	microS/cm	548
TDS	mg/lit	365
TSS	mg/lit	BQL(LOQ:5.0)
Ca-Hardness as CaCO3	mg/lit	106
Mg-Hardness as CaCO3	mg/lit	55
BOD	mg/lit	1.2
COD	mg/lit	3.1
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.58
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	4.6
E-coli	MPN/100ml	Absent

Parameters	Unit	Ground Water 03.01.2024
Temperature	degree C	22.2
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.188
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

## 1.1 (h) Surface water:- Chhapora Nala Down stream

Parameters	Unit	Surface Water 03.01.2024
Temperature	degree C	20.1 deg. C
pH Value		7.8
Electrical Conductivity	microS/cm	480
TDS	mg/lit	320
TSS	mg/lit	43
Ca-Hardness as CaCO3	mg/lit	120
Mg-Hardness as CaCO3	mg/lit	63
BOD	mg/lit	3.2
COD	mg/lit	9.6
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.46
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	78
E-coli	MPN/100ml	Absent

Temperature	degree C	20.1
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.172
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

# 1.1 (i) Surface water : Chhapora Nala Up stream

Parameters	Unit	Surface Water 03.01.2024
Temperature	degree C	20.8 deg. C
pH Value		7.5
Electrical Conductivity	microS/cm	515
TDS	mg/lit	343
TSS	mg/lit	48
Ca-Hardness as CaCO3	mg/lit	128
Mg-Hardness as CaCO3	mg/lit	65
BOD	mg/lit	3.7
COD	mg/lit	10.8
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.43
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	55
E-coli	MPN/100ml	Absent

Temperature	degree C	20.8
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.188
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

# 1.1 (j) Surface water : Kelo river Downstream water

Parameters	Unit	Surface Water 03.01.2024
Temperature	degree C	20.3 deg. C
pH Value		7.5
Electrical Conductivity	microS/cm	507
TDS	mg/lit	338
TSS	mg/lit	30
Ca-Hardness as CaCO3	mg/lit	115
Mg-Hardness as CaCO3	mg/lit	55
BOD	mg/lit	2.5
COD	mg/lit	7.6

Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.41
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	48
E-coli	MPN/100ml	Absent

Temperature	degree C	20.3
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.197
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

# 1.1 (k) Surface water : Mahanadi river Downstream water

Parameters	Unit	Surface Water 03.01.2024
Temperature	degree C	19.8 deg. C
pH Value		7.4
Electrical Conductivity	microS/cm	380
TDS	mg/lit	253
TSS	mg/lit	12.0
Ca-Hardness as CaCO3	mg/lit	92
Mg-Hardness as CaCO3	mg/lit	45
BOD	mg/lit	2.2
COD	mg/lit	6.7
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.47
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	44
E-coli	MPN/100ml	Absent

Temperature	degree C	19.8
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.172

Copper as Cu	mg/lit	BQL ( LOQ:0.0005)
Chromium Total as Cr	mg/lit	BQL ( LOQ:0.0005)
Zinc as Zn	mg/lit	BQL ( LOQ:0.0005)
Cadmium as Cd	mg/lit	BQL ( LOQ:0.0005)
Lead as Pb	mg/lit	BQL ( LOQ:0.0005)
Arsenic as As	mg/lit	BQL ( LOQ:0.0005)

# 1.1 (I) Ground water : Solid waste storage area- I

Parameters	Unit	Ground Water 03.01.2024
Temperature	degree C	21.2 deg. C
pH Value		7.4
Electrical Conductivity	microS/cm	515
TDS	mg/lit	343
TSS	mg/lit	BQL (LOQ:5.0)
Ca-Hardness as CaCO3	mg/lit	137
Mg-Hardness as CaCO3	mg/lit	63
BOD	mg/lit	1.1
COD	mg/lit	3.0
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.48
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	4.0
E-coli	MPN/100ml	Absent

Temperature	degree C	21.2
Mercury as Hg	mg/lit	BQL (LOQ:0.0005)
Chromium Hexa as Cr6	mg/lit	BQL ( LOQ:0.05)
Iron as Fe	mg/lit	0.094
Copper as Cu	mg/lit	BQL ( LOQ:0.0005)

E-coli	MPN/100ml	Absent	

## 1.1 (g) Surface water : Chhapora Nala Down stream

Parameters	Unit	Surface Water 07.02.2024
Temperature	degree C	21.8 deg. C
pH Value		7.4
Electrical Conductivity	microS/cm	524
TDS	mg/lit	349
TSS	mg/lit	38
Ca-Hardness as CaCO3	mg/lit	114
Mg-Hardness as CaCO3	mg/lit	58
BOD	mg/lit	4.4
COD	mg/lit	13.2
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.54
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	65
E-coli	MPN/100ml	Absent

## 1.1 (h) Surface water : Chhapora Nala Up stream

Parameters	Unit	Surface Water 07.02.2024	
Temperature	degree C	21.9 deg. C	
pH Value		7.6	
Electrical Conductivity	microS/cm	504	
TDS	mg/lit	336	
TSS	mg/lit	33	
Ca-Hardness as CaCO3	mg/lit	134	
Mg-Hardness as CaCO3	mg/lit	69	
BOD	mg/lit	4.1	
COD	mg/lit	12.2	
Oil & Grease	mg/lit	BQL ( LOQ:2.5)	
Fluoride (as F)	mg/lit	0.40	
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)	
Total Coliform	MPN/100ml	50	
E-coli	MPN/100ml	Absent	

## 1.1 (i) <u>Surface water : Kelo river Down Stream Water</u>

Parameters	Unit	Surface Water 07.02.2024
Temperature	degree C	21.7 deg. C
pH Value		7.8
Electrical Conductivity	microS/cm	486
TDS	mg/lit	324
TSS	mg/lit	23
Ca-Hardness as CaCO3	mg/lit	128
Mg-Hardness as CaCO3	mg/lit	60
BOD	mg/lit	2.3
COD	mg/lit	5.1
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.47
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	41
E-coli	MPN/100ml	Absent

#### 1.1 (e) Ground water Quality Plant nearby village: Mehloi

Parameters	Unit	Ground Water 06.03.2024
Temperature	degree C	25.1 deg. C
pH Value		7.7
Electrical Conductivity	microS/cm	505
TDS	mg/lit	336
TSS	mg/lit	BQL(LOQ:5.0)
Ca-Hardness as CaCO3	mg/lit	122
Mg-Hardness as CaCO3	mg/lit	62
BOD	mg/lit	0.9
COD	mg/lit	2.8
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.38
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	4.9
E-coli	MPN/100ml	Absent

#### 1.1 (f) Ground water Quality near Plant nearby village: Chhapora

Parameters	Unit	Ground Water 06.03.2024
Temperature	degree C	24.9 deg. C
pH Value		7.6
Electrical Conductivity	microS/cm	510
TDS	mg/lit	340
TSS	mg/lit	BQL(LOQ:5.0)
Ca-Hardness as CaCO3	mg/lit	118
Mg-Hardness as CaCO3	mg/lit	62
BOD	mg/lit	1.2
COD	mg/lit	3.1
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.48
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	4.1
E-coli	MPN/100ml	Absent

## 1.1 (g) Surface water : Chhapora Nala Down stream

Parameters	Unit	Surface Water 06.03.2024
Temperature	degree C	23.1 deg. C
pH Value		7.6
Electrical Conductivity	microS/cm	493
TDS	mg/lit	328
TSS	mg/lit	40
Ca-Hardness as CaCO3	mg/lit	106
Mg-Hardness as CaCO3	mg/lit	53
BOD	mg/lit	4.6
COD	mg/lit	12.9
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.63
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	55
E-coli	MPN/100ml	Absent

## 1.1 (h) Surface water : Chhapora Nala Up stream

Parameters	Unit	Surface Water 06.03.2024
Temperature	degree C	23.4 deg. C
pH Value		7.3
Electrical Conductivity	microS/cm	510
TDS	mg/lit	340
TSS	mg/lit	32
Ca-Hardness as CaCO3	mg/lit	126
Mg-Hardness as CaCO3	mg/lit	61
BOD	mg/lit	4.2
COD	mg/lit	12.6
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.52
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	58
E-coli	MPN/100ml	Absent

## 1.1 (i) <u>Surface water : Kelo river Down Stream Water</u>

Parameters	Unit	Surface Water 06.03.2024
Temperature	degree C	23.2 deg. C
pH Value		7.6
Electrical Conductivity	microS/cm	498
TDS	mg/lit	332
TSS	mg/lit	24
Ca-Hardness as CaCO3	mg/lit	136
Mg-Hardness as CaCO3	mg/lit	67
BOD	mg/lit	2.8
COD	mg/lit	5.9
Oil & Grease	mg/lit	BQL ( LOQ:2.5)
Fluoride (as F)	mg/lit	0.41
Boron (as B)	mg/lit	BQL ( LOQ:0.0005)
Total Coliform	MPN/100ml	53
E-coli	MPN/100ml	Absent
